# Preparing High School Students for the Careers of Tomorrow

Empower your students with the skills they need to succeed
- *Data Modeling* • *SQL* • *Java* • *Business*
Two years of instruction……...Skills for life!

50% Discount for VA Schools

In support of Governor Warner's workforce preparation initiative, Oracle Corporation is discounting 2004-2005 Year 1 participations fees for Virginia high schools. See details on final page.

Schools placing their order by **December 15, 2003** will receive a student-recruiting packet with posters and goodies.

Curriculum Made Easy

Our lesson-by-lesson curriculum is four semester-long courses for students ages 16-19:
- Year 1: Data Modeling & SQL Programming
- Year 2: Java Programming I & II

Cutting Edge Technology

Academy students gain hands on experience developing, testing and even running database transactions against an actual hosted Oracle 9i database! With Oracle's enterprise learning management system, teachers can focus on their students, not their servers.

Integrated Curriculum

The Academy's unique integrated curriculum incorporates a wide array of creative online exercises, student materials, case studies and teacher-led instruction that are engaging and interdependent.

Industry Recognition and Student Achievement

Oracle provides students the opportunity to get Oracle Certified and conquer AP exams for Java. Academy curriculum meets several national standards such as:
- Advanced Placement CS exam from ETS
- National Math, Eng., Social Studies Standards

➢ Over 80% of students surveyed enjoy the program and praise its content.

➢ Over 81% of students surveyed believe participation in the Academy will help them either now or in future endeavors.

➢ Over 98% of instructors surveyed applauded the Academy staff and lead instructors during the institute.

Rave Reviews From the Academy Instructors of Institute 2003

"What an experience!"

"Thank you for a well organized, efficiently planned learning experience."
