Program Goals for Regional Academies to Ensure Success in K-8 Mathematics for Limited English Proficient (LEP) and Economically Disadvantaged Students

In this academy, educators will:

- create a mathematics climate of inclusion and comprehensible instruction for all students, especially for students acquiring English and those who are economically disadvantaged
- learn and apply strategies designed to effectively deliver mathematics content to students acquiring English as well as economically disadvantaged students
- read about and discuss the fundamental research and theories that apply to English language development practice and mathematics understanding
- experience classroom applications of methods that increase conceptual understanding in mathematics for every student
- integrate language and mathematics objectives so students can increase their understanding of mathematics while they improve their academic language skills
- increase their awareness, competence, and confidence in mathematics

Virginia Department of Education Division of Instruction: Regional Academies to Ensure Success in K-8 Mathematics for Limited English Proficient (LEP) and Economically Disadvantaged Students

Target Audience: Teachers in school divisions that need assistance in meeting the adequate yearly progress (AYP) targets in mathematics
