VIRGINIA BEACH CITY PUBLIC SCHOOLS
AHEAD OF THE CURVE

James G. Merrill, Ed.D.
Superintendent

January 9, 2013

Dear Charter School Review Committee:

Virginia Beach City Public Schools (VBCPS) is the largest school division in Hampton Roads – southeastern Virginia – serving over 69,000 students in grades K-12. Currently, the school system includes 56 elementary schools, 14 middle schools, 11 high schools, and 4 secondary/post-secondary specialty centers.

At this time, VBCPS has no charter school programs, although a system has been in place to review and approve charter schools in the division since 1998, when legislation was passed in the Virginia General Assembly. Pursuant to legislation approved by the 2010 Virginia General Assembly, prior to submitting an application to a local school board, charter school applicants are required to submit their applications to the Virginia Board of Education (VBOE) for a determination as to whether the application meets the Board's approval.

VBCPS is very supportive of the charter proposal by the Green Run Collegiate Board. The school division is offering technical support during the development of the charter application and will speak in support of the charter school during the VBOE review process. Several division employees, a VBCPS School Board member, a graduate of Green Run High School, and an active Virginia Beach community member sit on the governing board of Green Run Collegiate.

This college preparatory program is designed to address the needs of our military community and students not meeting their academic potential. Should the VBOE provide a favorable review and the Virginia Beach School Board approve the application, Green Run Collegiate would be the first charter school approved in the school division.

Please accept this letter as an indication of our strong support for the Green Run Collegiate Charter School. We look forward to the opening of this charter school in the Green Run community of Virginia Beach.

Sincerely,

James G. Merrill, Ed.D.
Superintendent

Green Run
Homes Association

June 5, 2012

To Whom It May Concern;

I am writing to express my support for the proposed Green Run Collegiate Academy. My name is Rob Ewell and I serve on the Board of Directors for the Green Run Homes Association. The Association has been in existence since 1970 with a purpose of supporting our community through recreational endeavors and efforts to support our members through various programs and events. We are one of the largest property associations in Virginia with over 16,000 members. Green Run High School is one of only two high schools that our community feeds. Many of our residents either currently have a student at Green Run High School or will have one attending in the future.

Additionally, many of our residents who normally would attend Green Run High School are traveling to other schools for academy programs that are not available to students in our area. Green Run Homes Association works closely with Green Run High School through Partners in Education to support our community youth. A Collegiate Academy would be a much needed addition to the educational schema currently being offered to students. Presently our community youth is a diverse group coming from all walks of life including many military families.

My current understanding of the proposed program is that it would include an emphasis on motivating our youth to further their education, be active in their community, facilitate more parental involvement and address the needs of students in a creative and unique way that will assist them in preparing for college, careers and global citizenship.

The Green Run Collegiate Academy would be an extremely positive asset to the Green Run community. I recommend and fully support the creation of this charter school leasing space at Green Run High School. This is a unique opportunity to better use our vacant classroom facilities and increase academic choices in the Green Run area.

Sincerely,

Robert Ewell
Director, Board of Directors
Green Run Homes Association

MEN OF FAITH

Ronald Taylor, President
P O Box 56671
Virginia Beach, VA 23456
(757) 237-6257

January 3, 2012

Governing Board of the Green Run Collegiate:

We are writing to express our support for the proposed Green Run Collegiate. My name is Ronald Taylor and am Vice President of the Men of Faith. Our organization has been in partnership with the Virginia Beach City Public Schools since 2008 and was recognized in 2012 as a Model Partnership. We are the providers of the DAYWATCH program, a support mentoring program for out of school suspended youth in three locations throughout the city. We are providing a STEM initiative Saturday program for the Green Run community starting in January. In addition, we actively collaborate with VBCPS Equity Council, Diversity Training, Mentorship and Tutorial programs and the African American Male Leadership Summit. We also collaborate on offering a creative arts program through the Starlight Creative Arts Center for elementary students from Green Run and Holland. The Men of Faith focuses their partnership contributions to support student success.

Additionally, many of our programs are focused in the Green Run community and are made available to children from the community schools. Knowing that opportunities for specialized programs are limited, the provision of the proposed Green Run Collegiate would be an outstanding addition. Presently community youth from the Green Run area are a diverse group coming from all walks of life including many military families.

Our current understanding of the proposed program is that it would include an emphasis on motivating our youth to further their education, be active in their community, facilitate more parental involvement and address the needs of students in a creative and unique way that will assist them in preparing for college, careers and global citizenship.

The Green Run Collegiate would be an extremely positive asset to the Green Run community. The Men of Faith recommend and fully support the creation of this charter school leasing space at Green Run High School. This is a unique opportunity to better use our vacant classroom facilities and increase academic choices in the Green Run area.

Sincerely,

Ronald Taylor
Men of Faith/ President

January 7, 2013

Dear Governing Board of Directors,

Military service life requires frequent transitions and changes for our families. These changes may occur in everything from the homes we live in and the friends we have made, to the schools our children attend and the curriculum that is implemented there. With states having autonomy in their education standards and no fully-implemented national core curriculum, our dependents (military students) may often experience gaps in their educational journey.

Green Run Collegiate (GRC), the proposed non-profit Virginia Beach City Charter School that emphasizes academic performance and college readiness, appears to address some of these issues. Its implementation of an International Baccalaureate (IB) Program of instruction that would continue to cover Virginia's Standards of Learning could offer mobile military students the opportunity for greater curriculum continuity. Additionally, by offering support systems such as smaller learning environments and strong advisory relationships between students and staff, educational gaps that military students might experience may be more easily addressed.

It is my understanding that the Advancement Via Individual Determination (AVID) program, a program that will supplement the IB Program at GRC, currently serves over 425,000 students internationally with 4,800 schools participating. This college readiness system focuses on leadership and instruction, as well as behaviors and work habits that are needed to succeed in rigorous programs of study. The AVID program is currently adopted by all Department of Defense schools and could provide another marker of continuity for military students.

It is with great interest in, and support for, the Green Run Collegiate Charter School currently being proposed, that I submit this letter to the Governing Board. As an active duty military parent, I feel this initiative expands the opportunities for educational choice and addresses current issues that are of interest to those of us that experience a mobile lifestyle.

Sincerely,

J. D. RHOADS
Commander, U. S. Navy
Executive Officer,
Joint Expeditionary Base
Little Creek-Fort Story

January 2, 2013

Dear Governing Board of Directors,

As military liaison and advocate for Lincoln Military Housing, and a retired Navy Command Master Chief, I fully support the proposed Green Run Collegiate (GRC) at Green Run High School. The GRC would bring a superb initiative in furthering the educational opportunities for our military families living in the Green Run district, with many of them residing here in our Midway Manor community.

Military service life often requires frequent transitions and changes for our families. These changes occur in everything from the homes they live in and friends made, to the schools their children attend and the curriculum offered. With states having autonomy in their education standards, military students may often experience gaps in their educational journey.

Green Run Collegiate (GRC), the proposed non-profit Virginia Beach City Charter school that emphasizes academic performance and college readiness, appears to address some of these issues. Its implementation of an International Baccalaureate (IB) Programme of instruction that would continue to cover Virginia's Standards of Learning, could offer mobile military students the opportunity for greater curriculum continuity. Educational gaps that students might experience may be more easily addressed by offering support systems, such as smaller learning environments and strong advisory relationships between students and staff.

The Advancement Via Individual Determination (AVID) program, a program that will supplement the IB Programme at GRC, currently serves over 425,000 students internationally with 4,800 schools participating. This college readiness system focuses on leadership and instruction, as well as, behaviors and work habits that are needed to succeed in rigorous programs of study. Currently adopted by all Department of Defense schools, this could provide another opportunity of continuity for military students.

It is with great interest in, and support for, the Green Run Collegiate Charter School currently being proposed, that I submit this letter to the Governing Board. As a retired military parent and Lincoln's advocate for our military families, I feel this initiative expands the opportunities for educational choice and addresses current issues that are of interest to those that experience this challenging mobile lifestyle.

Sincerely,

J Cox

Jim Cox, USN (Ret), CDPM
Director of Military Affairs
Lincoln Military Housing

January 2, 2013

Dear Governing Board of Directors,

Military service life requires frequent transitions and changes for our families. These changes may occur in everything from the homes we live in and the friends we have made, to the schools our children attend and the curriculum that is applied there. With states having autonomy in their education standards, military students may often experience gaps in their educational journey.

Green Run Collegiate (GRC), the proposed non-profit Virginia Beach City Charter school that emphasizes academic performance and college readiness, appears to address some of these issues. Its implementation of an International Baccalaureate (IB) Programme of instruction that would continue to cover Virginia's Standards of Learning, could offer mobile military students the opportunity for greater curriculum continuity. Educational gaps that military students might experience may be more easily addressed by offering support systems, such as smaller learning environments and strong advisory relationships between students and staff.

The Advancement Via Individual Determination (AVID) program, a program that will supplement the IB Programme at GRC, currently serves over 425,000 students internationally with 4,800 schools participating. Currently adopted by all Department of Defense schools, this could provide another opportunity of continuity for military students.

It is with great interest in, and support for, the Green Run Collegiate Charter School currently being proposed, that I submit this letter to the Governing Board. As an advocate for active duty military parents, I feel this initiative expands the opportunities for educational choice and addresses current issues that are of interest to those of us that experience a mobile lifestyle.

V/R,
Nancy Byrne
NAS Oceana CYP

School Liaison Officer
Naval Air Station Oceana
Virginia Beach, VA

December 21, 2012

Dear Governing Board of Green Run Collegiate,

As the Navy School Liaison Officer of Naval Air Station (NAS) Oceana, it is with great pleasure to extend this letter of support for the proposed Green Run Collegiate (GRC), at Green Run High School.

School transition and deployment support is a readiness and retention issue for our military members and that will continue. Military connected students are considered by many to be at risk because of their mobile lifestyle. Military students attend up to nine different schools by graduation and the constant changes in schools and locations can challenge them socially and emotionally.

At Green Run High School, a little over 25% of student enrollment is military impacted, and those families living in Lincoln Military Housing at Midway Manor feed off to the high school. The GRC would provide them an opportunity of a lifetime. Studies show the importance of an International Baccalaureate (IB) Program and the Advancement Via Individual Determination (AVID) Program throughout the nation. Our military families need the assurance that their children will be able to participate in a rigorous academic program, such as IB and AVID, for the security of their future.

I would be extremely grateful if you would accept my letter in support of the Green Run Collegiate to the community, and the Local Education Activity of Virginia Beach.

Sincerely,

John Hammer
School Liaison Officer

School Liaison Officer
Joint Expeditionary Base Little Creek-Fort Story
Virginia Beach, Virginia 23459-2518

January 2, 2013

Dear Governing Board of Green Run Collegiate,

As the Navy School Liaison Officer for Joint Expeditionary Base (JEB) Little Creek-Fort Story, it is with great pleasure that I write this letter of support for the proposed public charter school - Green Run Collegiate (GRC).

The Navy School Liaison Officer (SLO) position was created approximately five years ago, in response to Navy leadership's recognition that a highly mobile military life creates educational inconsistency for service member's children. With the average military family moving every 2.9 years, some children may attend as many as 9 different schools before graduation. One component of the SLO position is to offer transitioning families information regarding the educational opportunities that are available (public, private and homeschooling) at their new duty station.

As I understand the proposal, Green Run Collegiate will implement an International Baccalaureate (IB) Programme of instruction, while continuing to meet the Virginia Standards of Learning. This programme, which is recognized universally in approximately 1500 schools worldwide, would allow for greater curriculum continuity for any mobile military student interested in participating. Additionally, it appears that systems will be put in place to address educational gaps that students may have experienced as a result of multiple moves. With 100 students per grade level set as full capacity, a "small school" feeling with individual focus can be achieved. The intentions of smaller learning environments and on-going advisory groupings between students and staff will promote the sense of school connectedness that has been cited routinely as a marker for student success.

With both social and emotional connections addressed, and academic curriculum and support systems provided, it is with true excitement that I look forward to sharing this educational opportunity with our military families should this proposal be approved. As an educator with experience in both public and private institutions, I see Green Run Collegiate as an expansion of choice within the public sector and a truly inclusive environment that will provide a wide range of educational opportunities for any student determined to pursue post-secondary goals.

Sincerely,

Deborah L. Patch, M.S.Ed.
School Liaison Officer
Joint Expeditionary Base Little Creek-Fort Story

VIRGINIA BEACH CITY PUBLIC SCHOOLS

A H E A D O F T H E C U R V E

Department of Curriculum and Instruction
Office of Guidance Services and Student Records

January 10, 2013

RE: Letter of Support for Green Run Collegiate

We are writing in support of the proposal to establish Green Run Collegiate, which will offer the AVID (Advancement via Individual Determination) college readiness systems as part of its academic program. AVID is a research-based, college-readiness system designed to increase the number of students who enroll and persist in four-year colleges or universities. AVID focuses on the least served students in the academic middle. Therefore inclusion of AVID at Green Run Collegiate is in alignment with the goals, mission, and outcome for students as stated in the charter application.

The Office of Guidance Services and Student Records provides support to AVID elective teachers, school counselors, core teachers, school administrators, and 1,300 AVID students enrolled in the AVID elective course at 12 middle schools and feeder high schools in Virginia Beach City Public Schools. Currently, AVID has been adopted by nearly 4,800 schools in 48 states, the District of Columbia, and 16 countries/territories. The system serves more than 425,000 students worldwide. Green Run High School, host to the prospective Green Run Collegiate, has been creating a college-ready culture with the AVID system since 2007 and currently supports 138 AVID students, over 8 percent of the school population, in grades 9 through 12 with the AVID elective course and school-wide implementation of AVID instructional strategies and methodologies.

The prospect of establishing an IB/AVID charter school at Green Run High School creates an opportunity for AVID systems to strengthen school-wide to build a college-going philosophy and learning process that reaches every classroom in the school. The Office of Guidance Services and Student Records will offer support and guidance to students and staff when the Green Run Collegiate charter is ratified. This charter school is especially important to the Office of Guidance Services and Student Records because one of the goals of our office is to help students to achieve academically, graduate from high school on time, be prepared to enroll and perform in colleges and universities, and pursue meaningful careers. We support the charter application for Green Run Collegiate and the inclusion of AVID as a component of its instructional program.

Sincerely,

Alveta Green Mitchell, Ed.D.
Director

Linda J. Love, Ed.D.

Petition of Support for Green Run Collegiate

Petition summary and background	Virginia Beach City Public Schools (VBCPS) is recognized as one of the top school districts in Virginia and in the nation. The School Board of the City of Virginia Beach, the superintendent, cabinet members, principals, teachers, and staff who work in VBCPS are proud of the accomplishments of the school division. In 2008, VBCPS adopted *Compass to 2015: A Strategic Plan for Student Success*. This plan addressed objectives to ensure all students were academically proficient, effective communicators and collaborators, globally aware, independent, responsible learners and citizens, and critical and creative thinkers, innovators, and problem solvers. Much work has been done in VBCPS; however, local and national achievement gaps for socio-economic and racial/ethnic groups persist, and there is an increased demand in the division for portable, rigorous academic programs for highly mobile military connected youth. The charter school will offer the division new tools in their portfolio to address some of the more persistent gaps and the unique needs of military connected youth. Charter Schools operate under highly accountable contracts to improve academic achievement. Green Run Collegiate (GRC) will implement strategies that, if proven effective, can be replicated within the school division. Your signature on this petition indicates your support for Green Run Collegiate including the following: **Mission**: The Mission of Green Run Collegiate (GRC) (grades 9-12) is to engage students in critical thinking and teamwork to empower them toward college and career readiness and global citizenship as community leaders. GRC, as a Virginia Beach City Public Charter School, will be committed to providing all students with the necessary skills to thrive as 21st century learners, workers, and citizens. **Goals:** To increase academic performance and college readiness in the Green Run area of Virginia Beach in alignment with the VBCPS Strategic Plan. GRC will address the high demand for International Baccalaureate® (IB) enrollment, implement unique strategies to close achievement gaps, and provide a consistent approach to education for highly mobile military connected students in alignment with the recommendations of the Military Child Education Coalition. **Population**: Green Run Collegiate will serve students in grades 9-12 with approximately 100 students at each grade level. Outreach activities will target students specifically in the Green Run community, students not achieving to their academic potential, and military connected youth. Green Run High School currently does not have a content specific, high interest academy program as seven other Virginia Beach High Schools have and there is a high demand for an additional IB Programme in the school division. **Timeline:** The school will open in September 2013 with 9th grade students and add one grade level per year until we are at full capacity serving 400 students residing in the Virginia Beach City Public School division. **Need:** Green Run Collegiate will be a college preparatory charter school program in an area with increasing poverty levels. Feeder schools for Green Run Collegiate exceed 57% of students qualifying for the free and reduced school meal program. Only 16% of students taking advanced placement courses at Green Run High School achieve a passing score compared with 57% in the rest of the VBCPS school division based on data from the 2010-2011 school year. Nearly 30% of the youth attending Virginia Beach City Public Schools are connected with the military installations and several schools exceed 60% of its student body connected to the military. **Curriculum:** The Governing Board Members of the charter school believe that the Virginia Standards of Learning (SOL) set a minimum bar for academic achievement benchmarks that all GRC students must meet and that students

	must achieve above and beyond Virginia standards to fulfill their post-secondary goals in today's global economic environment. GRC will implement an International Baccalaureate® (IB) Program of instruction. An IB education is a portable education. There are nearly 1,500 IB schools worldwide. An IB student can readily move between IB schools, ensuring they are taught towards the same exams, with similar curriculum and program standards in place. Research from several sources, including a Chicago Public Schools case study, indicates that the IB Program stands out among other high school curricula because it offers a rigorous, aligned, integrated instructional system that is both appropriate and valuable for students of average skill proficiency, and transformative for minority and low income, i.e. "high need", students. [i] **College Readiness:** The IB Program will be supplemented by the Advancement Via Individual Determination (AVID) Program for all enrolled students. AVID serves over 425,000 students in 4,800 schools in 48 states, the District of Columbia and across 16 countries. AVID also has been adopted by all Department of Defense Schools. Policy makers and school administrators consider AVID an essential strategy for closing achievement gaps and making college dreams possible for all students. GRC will pilot the first whole school AVID Program in Virginia Beach. **Community Support:** The GRC Proposal is led by seasoned educators and community leaders with strong ties to Virginia Beach City Public Schools. We recognize the achievements of public schools in Virginia Beach and seek to add to the division's successful portfolio of public schools. Our intention is to offer a choice with unique strategies, such as a longer calendar year, a smaller learning environment, a lottery system for enrollment, advisory grouping to promote strong relationships between students, teachers, families, business leaders, and our military connected community, and intensive college preparation for all students.

	must achieve above and beyond Virginia standards to fulfill their post-secondary goals in today's global economic environment. GRC will implement an International Baccalaureate® (IB) Program of instruction. An IB education is a portable education. There are nearly 1,500 IB schools worldwide. An IB student can readily move between IB schools, ensuring they are taught towards the same exams, with similar curriculum and program standards in place. Research from several sources, including a Chicago Public Schools case study, indicates that the IB Program stands out among other high school curricula because it offers a rigorous, aligned, integrated instructional system that is both appropriate and valuable for students of average skill proficiency, and transformative for minority and low income, i.e. "high need", students. [i] **College Readiness:** The IB Program will be supplemented by the Advancement Via Individual Determination (AVID) Program for all enrolled students. AVID serves over 425,000 students in 4,800 schools in 48 states, the District of Columbia and across 16 countries. AVID also has been adopted by all Department of Defense Schools. Policy makers and school administrators consider AVID an essential strategy for closing achievement gaps and making college dreams possible for all students. GRC will pilot the first whole school AVID Program in Virginia Beach. **Community Support:** The GRC Proposal is led by seasoned educators and community leaders with strong ties to Virginia Beach City Public Schools. We recognize the achievements of public schools in Virginia Beach and seek to add to the division's successful portfolio of public schools. Our intention is to offer a choice with unique strategies, such as a longer calendar year, a smaller learning environment, a lottery system for enrollment, advisory grouping to promote strong relationships between students, teachers, families, business leaders, and our military connected community, and intensive college preparation for all students.
Action petitioned for	**We, the undersigned, are Virginia Beach City school administrators, teachers, or stakeholders who support approving the Public Charter School Application for Green Run Collegiate.**

Research from several sources, including a Chicago Public Schools case study, indicates that the IB Program stands out among other high school curricula because it offers a rigorous, aligned, integrated instructional system that is both appropriate and valuable for students of average skill proficiency, and transformative for minority and low income, i.e. "high need", students. [i] **College Readiness:** The IB Program will be supplemented by the Advancement Via Individual Determination (AVID) Program for all enrolled students. AVID serves over 425,000 students in 4,800 schools in 48 states, the District of Columbia and across 16 countries. AVID also has been adopted by all Department of Defense Schools. Policy makers and school administrators consider AVID an essential strategy for closing achievement gaps and making college dreams possible for all students. GRC will pilot the first whole school AVID Program in Virginia Beach. **Community Support:** The GRC Proposal is led by seasoned educators and community leaders with strong ties to Virginia Beach City Public Schools. We recognize the achievements of public schools in Virginia Beach and seek to add to the division's successful portfolio of public schools. Our intention is to offer a choice with unique strategies, such as a longer calendar year, a smaller learning environment, a lottery system for enrollment, advisory grouping to promote strong relationships between students, teachers, families, business leaders, and our military connected community, and intensive college preparation for all students.
Action petitioned for	**We, the undersigned, are Virginia Beach City school administrators, teachers, or stakeholders who support approving the Public Charter School Application for Green Run Collegiate.**

	must achieve above and beyond Virginia standards to fulfill their post-secondary goals in today's global economic environment. GRC will implement an International Baccalaureate® (IB) Program of instruction. An IB education is a portable education. There are nearly 1,500 IB schools worldwide. An IB student can readily move between IB schools, ensuring they are taught towards the same exams, with similar curriculum and program standards in place. Research from several sources, including a Chicago Public Schools case study, indicates that the IB Program stands out among other high school curricula because it offers a rigorous, aligned, integrated instructional system that is both appropriate and valuable for students of average skill proficiency, and transformative for minority and low income, i.e. "high need", students. [i] **College Readiness:** The IB Program will be supplemented by the Advancement Via Individual Determination (AVID) Program for all enrolled students.
