

Graph Translation Activity

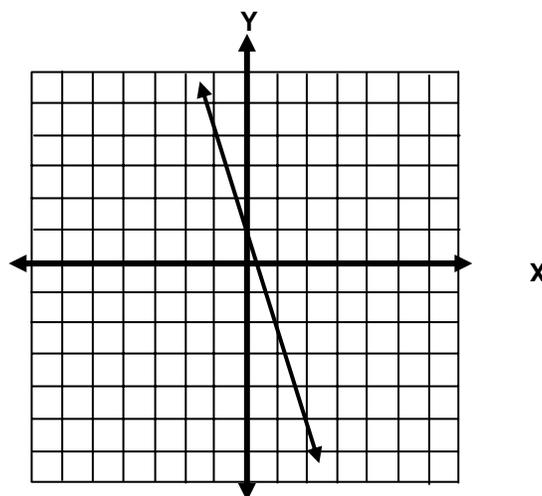

Directions:

- Copy the following pages on cardstock. Laminate and cut apart. (Students can use dry erase markers to write on laminated cards).
- Students work in small groups to match sets of four cards. The four cards in a matching set should contain:
 1. The original problem with the shift direction
 2. The graph of the original equation
 3. The shifted equation
 4. The shifted graph

1. $y = -3x - 1$
Shift up 2

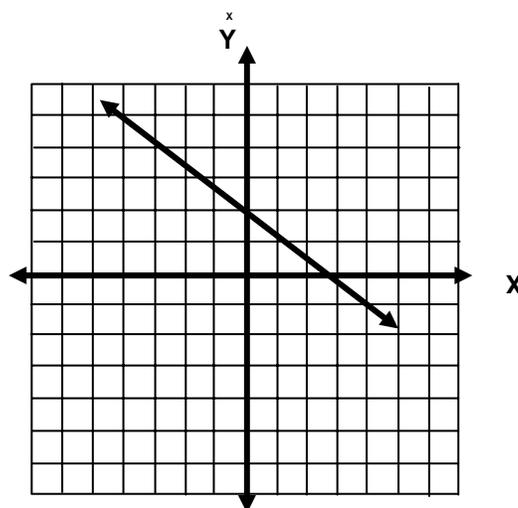

$y = -3x + 1$

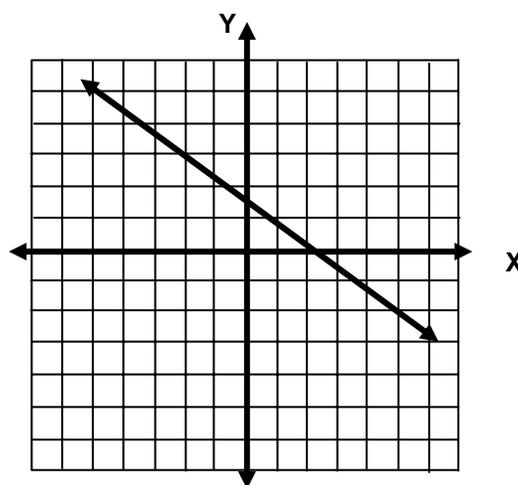

2. $y = -\frac{3}{4}x + 2$

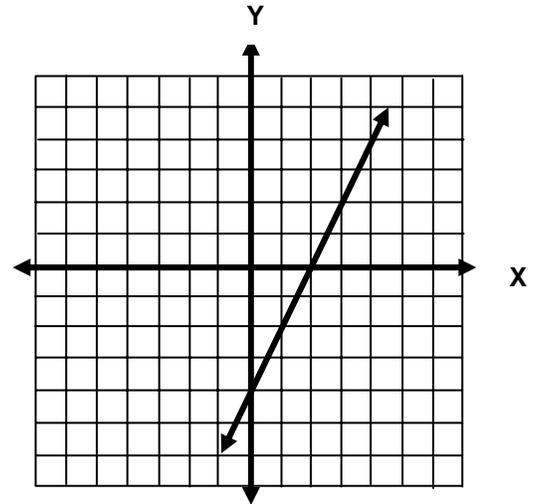

Shift down 4

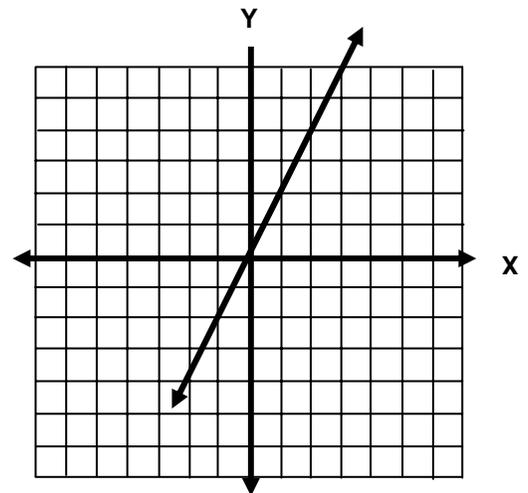

$y = -\frac{3}{4}x - 2$

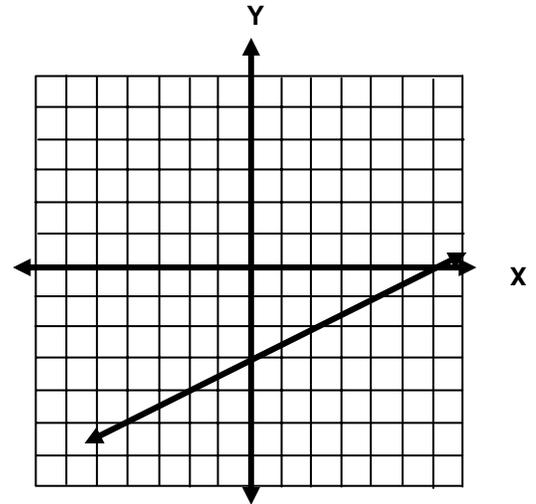

3. $y = 2x - 4$
Shift up 5

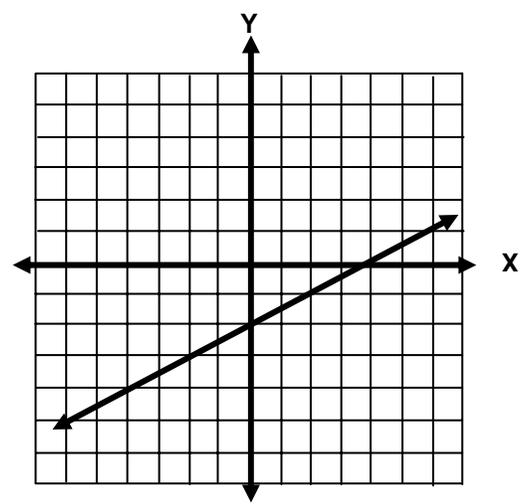

$y = 2x + 1$

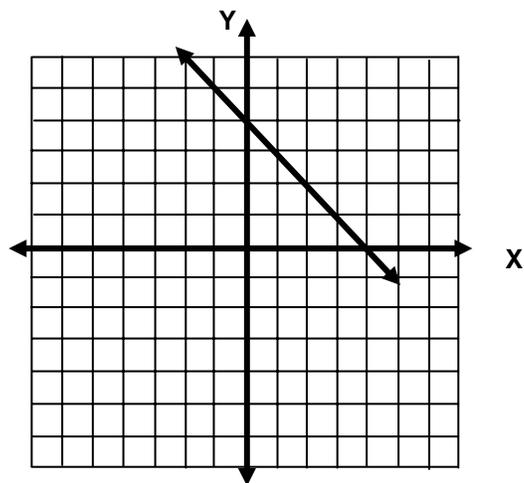

4. $y = \frac{1}{2}x - 3$
Shift up 1

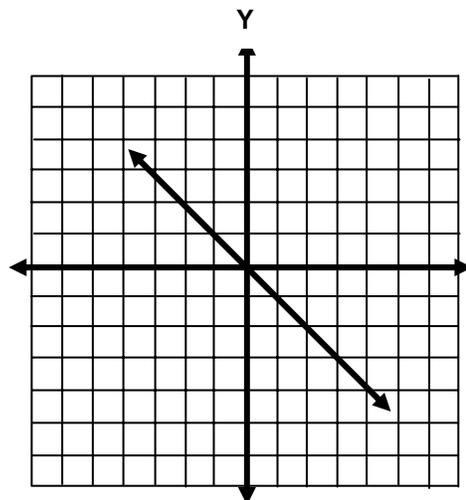

$y = \frac{1}{2}x - 2$

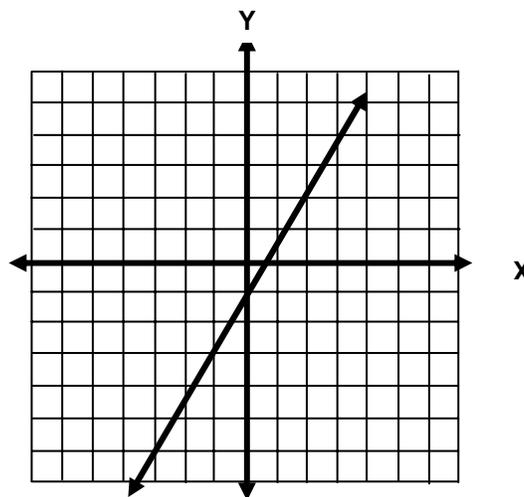

5. $y = -x + 4$
Shift down 4

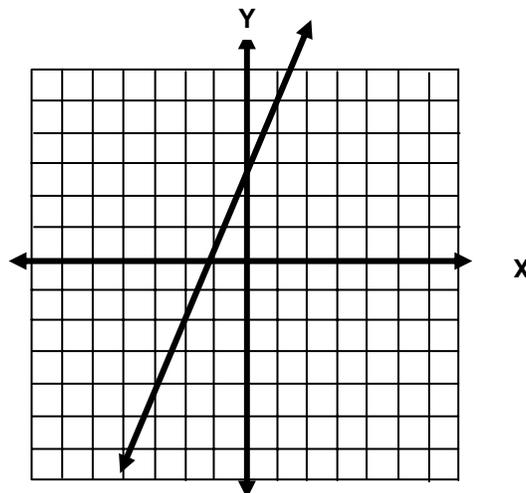

$$y = -x$$

6. $y = 2x - 1$
Shift up 4

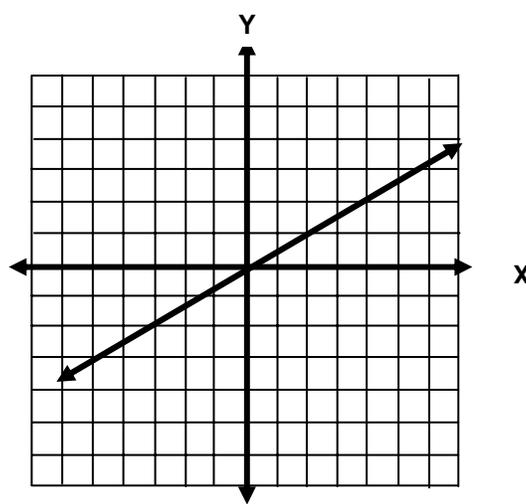

$$y = 2x + 3$$

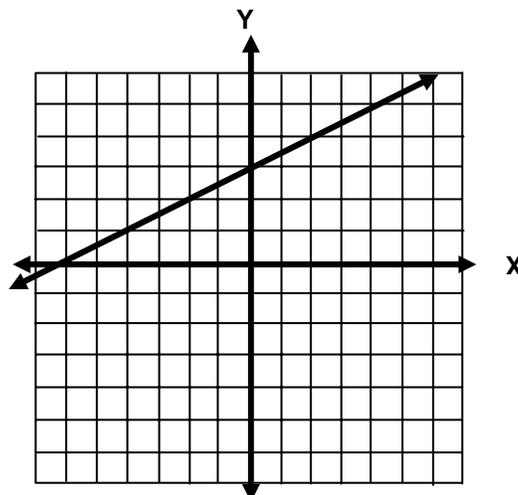

7. $y = \frac{1x}{2}$

Shift up three

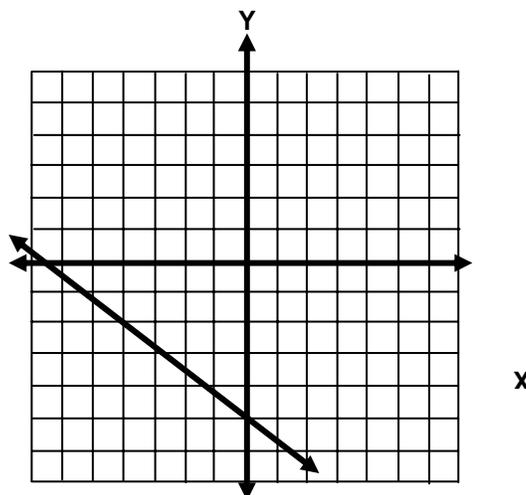

$y = \frac{1x + 3}{2}$

8. $y = \frac{-3x - 5}{4}$

Shift up 6

$y = \frac{-3x + 1}{4}$
