

Pricing Schedule

For each assessment offered, using the scenario of a minimum of 5,000 units (tests or students as stated in the proposal) STATEWIDE per year, the required information and pricing per year must be provided using the table layout below. The unit price entered in Column E may be in addition to a fixed price entered in Column D or instead of a fixed price entered in Column D. If only a unit price is offered, "0" should be entered in Column D. If only a fixed price is offered, "0" should be entered in Column E. DOE will evaluate price based on the amount entered in Column F (final fixed price + (the unit price times 5,000)). A school division who chooses to use the contract for a given year would actually pay the final fixed price + the final unit price times the number of tests actually administered.

Pricing Structure

The pricing provided in the table below shows the fixed price of a basic training plan per school division (column D) as outlined in section 3.C. of our narrative response, as well as the unit price per student subscription (column E). Student subscription represents the cost per student, regardless of the number of times he or she is assessed.¹ If a school division purchases more than one STAR assessment, then the fixed price (column D) for the second and/or third STAR assessments is waived each year during the duration of the contract.

A. Assessment Description Attachment #	B. Name of Assessment	C. Content Area	D. Fixed Price Per Year Per Division	E. Unit Price (per test or per student)	F. Total Proposed Price for Scenario (Column D + ((5,000 * Column E)
