Guidelines for Specialized Health Care Procedures
(Revision 2004)

Vickie H. Southall, MSN, RN
Family, Community, and Mental Health Systems Department
School of Nursing
University of Virginia

for the
Virginia Department of Health
Foreword

The Virginia Department of Health (VDH) and the Virginia Department of Education (DOE) are pleased to present a revised edition of *Guidelines for Specialized Health Care Procedures*, a resource document for school personnel. The Guidelines were developed and published by VDH in collaboration with DOE.

The Guidelines are intended to provide guidance to school administrators, school nurses, teachers, and other staff members on the care of students with special health care needs during the school day.

The Guidelines also present current, practical health information and recommendations for the development of local programs and policies related to the health care services for these students.

Through these Guidelines, VDH and DOE are committed to assuring that all schools in the Commonwealth have a safe and healthy learning environment.

Robert B. Stroube, MD, MPH
State Health Commissioner

Jo Lynne DeMary, EdD
Superintendent of Public Instruction

Date 07/26/2004

Date Sept. 10, 2004
Acknowledgements

The Guidelines for Specialized Health Procedures was developed with funding provided by the Maternal and Child Health Bureau, Health Resources and Services Administration.

Special thanks are extended to Vickie Southall, RN, MSN, the primary author of the revised Guidelines, a review panel of school nurses and medical providers, and Gwen Smith, RN, MSN, with the Virginia Department of Education. The editor was Carol Pollock, RN, MSN, FNP, with the Virginia Department of Health’s Division of Child and Adolescent Health.

Specialized Health Care Procedures Review Panel

Suzanne Burns, RN, MSN, RRT, CCRN, ACNP-CS, FAAN

# Table of Contents

**Foreword**  
**Acknowledgements**  
**Table of Contents**  
**Introduction**  

## Care of the Circulatory System  
- Circulatory System Overview  
- Central Venous Catheter  
- Management of PICC Lines  
- Heparin/Saline Lock—Intermittent Intravenous Device  
- Use of Needleless Systems and Safer Medical Devices  
- Procedure for One-Handed Needle Recapping  

## Care of the Endocrine System  
- Diabetes Overview  
- Diabetes Medical Management Plan  
  - Procedure for Blood Glucose Testing  
  - Procedure for Mild or Moderate Low Blood Glucose  
  - Emergency Procedure for Severe Low Blood Glucose  
- Glucagon  
  - Procedure for Giving Glucagon for Severe Hypoglycemia  
  - Procedure for High Blood Glucose  
  - Procedure for Testing Urine Ketones  
- Insulin  
  - Procedure for Insulin Administration by Syringe  
  - Procedure for Insulin Administration by Syringe – Two Types of Insulin Together  
  - Procedure for Insulin Pen Delivery System  
- Insulin Pump Therapy  
  - Procedure for Hypoglycemia with Pump Therapy  
  - Procedure for Hyperglycemia with Pump Therapy  
  - Procedure for Pump Alarms  

## Resources for Teachers, Child Care Providers, Parents, and Health Professionals  

## Care of the Gastrointestinal System  
- Gastrointestinal System Overview  
- Gastrostomy Tube  
  - Procedure for Gastrostomy Tube Feeding—Bolus Method  
  - Procedure for Gastrostomy Tube Feeding—Continuous Feeding by Pump or Slow Drip Method  
- Skin-Level or Low Profile Gastrostomy Devices (G-Button)  
  - Procedure for Skin-Level Gastrostomy Device Feeding—Bolus Method  
  - Procedure for Skin-Level Gastrostomy Device Feeding—Slow Drip or Continuous Feeding by Pump

Introduction

The Guidelines for Specialized Health Care Procedures is intended to enhance the educational process of students with special health care needs by providing guidance to school nurses, teachers, and other staff regarding the medical care of the students within the school setting. The Guidelines are based on current nursing and medical protocols for the care of children with special health care needs.

Parents or guardians have the primary responsibility for providing appropriate health care for their children. Whenever possible, parents are encouraged to work with their health care provider to administer medications and specialized health care procedures before or after school.

When procedures and medications need to be administered during school hours, the parents or guardians, health care provider, student (if appropriate), and school nurse should develop an individualized health care plan (IHCP) to outline what needs to be done during the school day. Parents or guardians also need to provide the school with comprehensive medical information, medications, medical equipment, and medical supplies to help school staff care for their child.

The Guidelines are intended to provide a broad framework for planning appropriate health care services for students with special health care needs. Because each student is different and has a unique array of needs, these guidelines should not be the sole source or a substitute for development of an IHCP that addresses the student’s health care needs. The Guidelines for Specialized Health Care Procedures also should be used as a tool to help school staff care for students with special health care needs. It does not attempt to provide medical advice and should not be used as a substitute for professional medical consultation.

The Guidelines are divided into eight sections reflecting systems of the body. Each section is further divided into an overview of the system, selected chronic conditions within the system, and an alphabetical listing of procedures affecting that system.

Appendix A includes sample individualized health care plans. Appendix B includes checklists that may be used to train staff on procedures.
