

Free Resources for Educators

1-to-1 Essentials Program

1-to-1 Essentials provides free, interactive, customizable tools that enable administrators to avoid the pitfalls that schools can face during a 1-to-1 implementation. The program includes turnkey resources that highlight best practices of 1-to-1 educators and gives schools the resources they need to prepare, plan, and implement a new program, including resources for engaging families, as well as students and teachers.

Digital Literacy and Citizenship Curriculum

Our K-12 curriculum, developed in partnership with Harvard University's Graduate School of Education, teaches students to be safe, responsible, and ethical online. The curriculum is flexible, modular, media-rich, and aligned to Common Core State Standards. Teachers select 45-minute lessons on topics ranging from cyberbullying and online privacy to digital footprints and creative credit and copyright.

Digital Passport™

Named one of 10 educational technologies you should try this year by eSchoolNews, Digital Passport™ presents a series of videos, interactive games, and activities all geared towards teaching 3rd-5th grade students how to be great digital citizens. Currently available on the web and on Edmodo with a classroom mobile edition available soon. Digital Passport supports CIPA compliance for E-rate discounts.

Graphite

Graphite is Common Sense Media's newest free service for educators. Created by teachers, for teachers, Graphite helps educators discover great digital learning content by providing unbiased and rigorous reviews of apps, games, and websites, and digital curricula rated for learning potential. Teachers on the site can also share personal reviews and field notes about how best to use the products in the classroom.

Professional Development for Teachers

Our professional development videos, webinars, and self-paced online tutorials support teachers by highlighting best practices and providing guidance for delivering effective digital citizenship lessons, including how to best align to the Common Core. Coming soon, we will provide resources for teachers on effective integration of apps, games, and websites into their curriculum on our new site, graphite.org.

Educate Families Program

Our program provides schools with a comprehensive set of resources to invite families into the conversation about digital literacy and citizenship. The materials let schools organize a series of family nights and distribute tip sheets, videos, and other tools. Now more than ever, families and schools must work together to empower kids for safe, responsible, and ethical behavior online and with mobile devices.
