

Everything Starts With a Vision

Tiered system of support, a common language, principles, expectations, the **infrastructure** starts

Who carries out this vision? **The Leadership Team** Build consensus, oversee infrastructure planning, communication, climate and culture

What do they need? A plan!

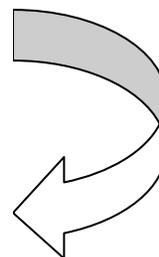

Needs Assessment, Blueprint, Assessment Mapping, VTSS Benchmarks, Benchmarks of Quality

Go get some data. **Universal Screening** and other "multiple measures"

Tier Definition Set up the system based on the data and assessments. Use decision making rules and entry and exit criteria. Be explicit about **Tier 1**; define good instruction at all tiers in reading, math, and behavior.

Problem Solving and Fidelity

Select Interventions for a **Continuum of Services**, **schedule** a time for interventions, and **allocate the resources** to deliver interventions

Intervention plans with student's goals can then be written; implement the plan!

Does it work? **Progress monitor** at the student level; Monitor student progress at all levels in a systematic manner Use **Data Based Decision Making** and build effective data team meetings with clarity of purpose

Evaluate the process based on the data, plan **Professional Development** based on need
