# Part 1: Introduction

## Why Good Evaluation is Necessary<sup>1</sup>

Principal evaluation matters because school leadership matters. In fact, “school leadership is frequently described as the key element of a high-quality school, and stories of the inspirational and effective principal are plentiful and oft-repeated.”<sup>2</sup> Research in the field has consistently revealed that school leadership has an important impact on student achievement gains or progress over years.<sup>3</sup> In addition to its impact on student achievement, research also indicates that effective school leadership has significant positive effect on student attendance, student engagement with school, student academic self-efficacy, staff satisfaction, and collective teacher efficacy.<sup>4</sup> Evaluation systems must be of high quality if we are to discern whether our principals are of high quality. The role of a principal requires a performance evaluation system that acknowledges the complexities of the job. Principals have a challenging task in meeting the educational needs of an educationally diverse student population, and good evaluation is necessary to provide the principals with the support, recognition, and guidance they need to sustain and improve their efforts.<sup>5</sup>

Because principals are so fundamentally important to school improvement and student success, improving the evaluation of principal performance is particularly relevant as a means to recognize excellence in leadership and to advance principal effectiveness. A meaningful evaluation focuses on professional standards, and through this focus and timely feedback, enables teachers and leaders to recognize, appreciate, value, and develop excellent leadership. The benefits of a rigorous evaluation system are numerous and well documented. Goldring and colleagues noted that when the process of evaluation is designed and implemented appropriately, it can be valuable for improvement of leadership quality and overall organizational performance in several ways, including:<sup>6</sup>

- as a benchmarking and assessing tool to document the effectiveness of principals for annual reviews and compensation;
- as a targeting tool to help principals focus on performance domains and behaviors that are associated with student learning;
- as a tool of continuous learning and development to provide both formative and summative feedback to principals, identify areas in need of improvement, and enable principals to make informed individualized decisions regarding professional development in order to bridge the gap between current practices and desired performance; and
- as a collective accountability tool to set the organizational goals and objectives of the school leader and larger schoolwide improvement.

## Problems with Current Evaluation Systems

Unfortunately, even though a principal’s effectiveness<sup>7</sup> is recognized as an important factor in improving student achievement, schools rarely measure, document, or use effectiveness ratings to inform decision-making.<sup>8</sup> The result is that it is difficult to distinguish among poor, average,

good, and excellent principals. A comprehensive review of principal leadership evaluation practices in the United States indicated that although states and divisions focused on a variety of performance areas (such as management, external environment, or personal traits) when evaluating their principals, they had very limited coverage of leadership behaviors that ensured rigorous curriculum and quality instruction, which are linked with schoolwide improvement for student learning, the ultimate purpose of schooling.<sup>9</sup> When examining the process of principal evaluation more closely, it was found that the usual practices of principal evaluation lacked justification and documentation in terms of the utility, psychometric properties, and accuracy of the instruments.<sup>10</sup> Ginsberg and Thompson commented that “the state of research on principal evaluation emphasizes the lack of empirically supported information about best practices.”<sup>11</sup>

Other flaws in the principal evaluation process include:

- an absence of meaningful and timely feedback from evaluation to most principals;
- a lack of impact and consequence of evaluation;
- an absence of clear communication of criteria and standard protocols in principal evaluation;
- a lack of relevance of the evaluation to enhance principal motivation and improve performance;<sup>12</sup> and
- inconsistencies in evaluation instruments that do not align with professional standards, which could produce role conflict and subsequent role strain as principals find it challenging to comprehend what they should focus their attention on.<sup>13</sup>

## **Importance of Recognizing Principal Effectiveness**

Characterizing principal effectiveness is important because there is a substantial relationship between the quality of the principal and student achievement. Principal leadership plays an important role in the selection, support, and success of school-level instructional process.<sup>14</sup> Waters, Marzano, and McNulty conducted a meta-analysis of research on effects of principal leadership practices on student achievement.<sup>15</sup> After analyzing studies conducted over a 30-year period, they found that the effectiveness of a school’s leadership is significantly associated with increased student academic performance. For instance, a number of leader behaviors related to vision, such as establishing clear goals and fostering shared beliefs, were associated with student learning. They found the average effect size between leadership and student achievement is .25. That means a one standard deviation improvement in leadership effectiveness can translate into an increase of ten percentile points in student achievement on a standardized, norm-referenced test. It is important to recognize that effective principals influence student learning, either directly or indirectly. It is also important to understand the ways and means by which principals influence their schools’ educational programs. Therefore, a rigorous principal evaluation system should be able to discriminate the performance of principals and provide informative feedback for improvement.

## Purposes of Evaluation

The primary purposes of a quality principal evaluation system are to:

- optimize student learning and growth;
- contribute to the successful achievement of the goals and objectives defined in the vision, mission, and goals of the school division;
- provide a basis for leadership improvement through productive principal performance appraisal and professional growth; and
- implement a performance evaluation system that promotes collaboration between the principal and evaluator and promotes self-growth, leadership effectiveness, and improvement of overall job performance.<sup>16</sup>

A high quality evaluation system includes the following distinguishing characteristics:

- benchmark behaviors for each of the principal performance standards;
- a focus on the relationship between principal performance and improved student learning and growth;
- the use of multiple data sources for documenting performance, including opportunities for principals to present evidence of their own performance as well as student growth;
- a procedure for conducting performance reviews that stresses accountability, promotes professional improvement, and increases principals' involvement in the evaluation process; and
- a support system for providing assistance when needed.<sup>17</sup>

## Purposes of this Document

This document was developed specifically for use with school principals and assistant principals. For the purpose of this document the term principal will be used to reference both principals and assistant principals. The Board of Education is required to establish performance standards and evaluation criteria for teachers, principals, and superintendents to serve as guidelines for school divisions to use in implementing educator evaluation systems.

The *Code of Virginia* requires (1) that principal evaluations be consistent with the **performance objectives (standards)** set forth in the Board of Education's *Guidelines for Uniform Performance Standards and Evaluation Criteria for Teachers, Administrators, and Superintendents* and (2) that school boards' procedures for evaluating principals and assistant principals address student academic progress.

Section 22.1-253.13:5 (Standard 5. Quality of classroom instruction and educational leadership) of the *Code of Virginia* states, in part, the following:

- B. Consistent with the finding that leadership is essential for the advancement of public education in the Commonwealth, teacher, administrator, and

superintendent evaluations shall be consistent with the performance objectives included in the *Guidelines for Uniform Performance Standards and Evaluation Criteria for Teachers, Administrators, and Superintendents*. Evaluations shall include student academic progress as a significant component and an overall summative rating. Teacher evaluations shall include regular observation and evidence that instruction is aligned with the school's curriculum. Evaluations shall include identification of areas of individual strengths and weaknesses and recommendations for appropriate professional activities....

Section 22.1-294. (Probationary terms of service for principals, assistant principals and supervisors; evaluation; reassigning principal, assistant principal or supervisor to teaching position) states, in part, the following:

- B. Each local school board shall adopt for use by the division superintendent clearly defined criteria for a performance evaluation process for principals, assistant principals, and supervisors that are consistent with the performance objectives set forth in the *Guidelines for Uniform Performance Standards and Evaluation Criteria for Teachers, Administrators, and Superintendents* as provided in § 22.1-253.13:5 and that includes, among other things, an assessment of such administrators' skills and knowledge; **student academic progress** [emphasis added] and school gains in student learning; and effectiveness in addressing school safety and enforcing student discipline. The division superintendent shall implement such performance evaluation process in making employment recommendations to the school board pursuant to § 22.1-293....

The *Guidelines for Uniform Performance Standards and Evaluation Criteria for Principals* set forth seven performance standards for all Virginia principals. Pursuant to state law, principal evaluations must be consistent with the performance standards (objectives) included in this document.

The *Guidelines for Uniform Performance Standards and Evaluation Criteria for Principals* provide school divisions with a model evaluation system, including sample forms and templates that may be implemented “as is” or used to refine existing local principal evaluation systems. Properly implemented, the evaluation system provides school divisions with the information needed to support systems of differentiated compensations or performance-based pay.

The *Code of Virginia* requires that school boards’ procedures for evaluating principals address student academic progress. The *Guidelines for Uniform Performance Standards and Evaluation Criteria for Principals* call for each principal to receive a summative evaluation rating and that the rating be determined by weighting the first six standards equally at 10 percent each, and the seventh standard, Student Academic Progress, account for 40 percent of the summative evaluation.

## **Part 2: Uniform Performance Standards for Principals**

The uniform performance standards for principals are used to collect and present data to document performance that is based on well-defined job expectations. They provide a balance between structure and flexibility and define common purposes and expectations, thereby guiding effective leadership. The performance standards also provide flexibility, encouraging creativity and individual principal initiative. The goal is to support the continuous growth and development of each principal by monitoring, analyzing, and applying pertinent data compiled within a system of meaningful feedback.

### **Defining Principal Performance Standards**

Clearly defined professional responsibilities constitute the foundation of the principal performance standards. A fair and comprehensive evaluation system provides sufficient detail and accuracy so that both principals and evaluators (i.e., superintendent, supervisor) reasonably understand the job expectations.

The expectations for professional performance are defined using a two-tiered approach of performance standards and performance indicators.

### **Performance Standards**

Performance standards define the criteria expected when principals perform their major duties. For all principals, there are seven performance standards as shown in Figure 2.1.

Figure 2.1: Performance Standards

<p><b>1. Instructional Leadership</b>  <i>The principal fosters the success of all students by facilitating the development, communication, implementation, and evaluation of a shared vision of teaching and learning that leads to student academic progress and school improvement.</i></p>
<p><b>2. School Climate</b>  <i>The principal fosters the success of all students by developing, advocating, and sustaining an academically rigorous, positive, and safe school climate for all stakeholders.</i></p>
<p><b>3. Human Resources Management</b>  <i>The principal fosters effective human resources management by assisting with selection and induction, and by supporting, evaluating, and retaining quality instructional and support personnel.</i></p>
<p><b>4. Organizational Management</b>  <i>The principal fosters the success of all students by supporting, managing, and overseeing the school's organization, operation, and use of resources.</i></p>
<p><b>5. Communication and Community Relations</b>  <i>The principal fosters the success of all students by communicating and collaborating effectively with stakeholders.</i></p>
<p><b>6. Professionalism</b>  <i>The principal fosters the success of all students by demonstrating professional standards and ethics, engaging in continuous professional development, and contributing to the profession.</i></p>
<p><b>7. Student Academic Progress</b>  <i>The principal's leadership results in acceptable, measurable student academic progress based on established standards.</i></p>

## Performance Indicators

Performance indicators provide examples of observable, tangible behavior that indicate the degree to which principals are meeting each standard. This helps principals and their evaluators clarify performance levels and job expectations. That is, the performance indicators provide the answer to what must be performed. Performance indicators are provided as examples of the types of performance that will occur if a standard is being fulfilled. However, the list of performance indicators is not exhaustive, and they are not intended to be prescriptive. It should be noted that indicators in one standard may be closely related to indicators in another standard. This is because the standards, themselves, are not mutually exclusive and may have overlapping aspects.

Evaluators and principals should consult the sample performance indicators for clarification of what constitutes a specific performance standard. ***Performance ratings are made at the performance standard level, NOT at the performance indicator level. Additionally, it is important to document a principal's performance on each standard with evidence generated from multiple performance indicators.*** Sample performance indicators for each of the performance standards follow.

**Note:** Performance Standard 7: If a principal effectively fulfills all previous standards, it is likely that the results of his or her leadership – as documented in Standard 7: Student Academic Progress – would be positive. The Virginia principal evaluation system includes the documentation of student growth as indicated within Standard 7 and recommends that the evidence of progress be reviewed and considered throughout the year. Trend analysis should be used where applicable.

## Part 3: Documenting Principal Performance

The role of a principal requires a performance evaluation system that acknowledges the contextual nature and complexities of the job. Multiple data sources provide for a comprehensive and authentic “performance portrait” of the principal’s work. The sources of information described in Figure 3.1 were selected to provide comprehensive and accurate feedback on principal performance.

Figure 3.1: *Suggested Documentation Sources for Principal Evaluation*

Data Source	Definition
Self-Evaluation	Self-evaluation reveals principals’ perceptions of their job performance. Results of a self-evaluation should inform principals’ personal goals for professional development.
Informal Observation/ School Site Visits	Informal observations/school site visits, applied in a variety of settings, provide information on a wide range of contributions made by principals. Informal observations/school site visits may range from watching how a principal interacts with others, to observing programs and shadowing the administrator.
Portfolio/ Document Log	Portfolios/document logs provide documentation generated by principals as evidence of meeting the seven performance standards.
Teacher/Staff Survey	Climate surveys provide information to principals about perceptions of job performance. The actual survey responses are seen only by the principal who prepares a survey summary for inclusion in the portfolio/document log.
Goal Setting	Principals, in conjunction with their evaluators, set goals for professional growth and school improvement.

**Note:** All recommended data sources may not always be necessary in a principal evaluation system. Rather, options are provided from which local decisions can be made to design the evaluation system in a manner that best fits local needs.

To address the contextual nature of the principal’s job, each principal should provide a school profile narrative to his or her evaluator. This may be done via the *Student Academic Progress Goal Setting Form*. It is strongly recommended that the principal also discuss the unique characteristics of the school with the evaluator.

### Alignment of Performance Standards with Data Sources

Whether a principal is meeting the performance standards may be evidenced through multiple data sources. Figure 3.2 shows the alignment of performance standards by data sources.

## Self-Evaluation

Self-evaluation is a process by which one may judge the effectiveness and adequacy of his or her performance, effects, knowledge, and beliefs for the purpose of self-improvement.<sup>18</sup> By thinking about what works, what does not work, and what type of changes one might make to be more successful, the likelihood of knowing how to improve and actually making the improvements increases dramatically.<sup>19</sup> Evidence suggests that self-evaluation is a critical component of the evaluation process and is strongly encouraged. Furthermore, self-evaluation can help a principal to target areas for professional development. A sample *Principal Self-Evaluation Form* is provided on the following pages.

## **Informal Observation/School Site Visits**

Informal observations/school site visits, applied in a variety of settings, provide information on a wide range of contributions made by principals. Informal observations/school site visits may range from watching how a principal interacts with others to observing programs and shadowing the administrator.

Site visits are a method by which evaluators may gain insight into whether principals are meeting the performance standards. Evaluators are encouraged to conduct multiple site visits to the principal's school. During a site visit, evaluators should discuss various aspects of the job with the principal. This can take the form of a formal interview or a less structured discussion. Through questioning, the evaluator may help the principal reflect on his or her performance, which may provide insight into how the principal is addressing the standards. Such a discussion may also help the principal to think through the artifacts he or she might submit to the evaluator to demonstrate proficiency in each standard. In addition, evaluators can use the principal's responses to the questions to determine issues they would like to further explore with the principal's faculty and staff. Furthermore, it is recognized that in many cases it takes time to effect change in a school, and by having an honest, open discussion, the principal is provided an opportunity to explain the successes and trials the school community has experienced in relation to school changes. The site visit also provides an opportunity for the evaluator to offer feedback. Suggested guiding questions an evaluator may want to address are included on the *Informal Observation/Site Visit Form* on the following page. Following the site visit, evaluators should provide feedback to the principal.

## **Portfolio/Document Log**

School divisions should consider a version of a portfolio or document log to best fit their needs. Artifacts of a principal's performance can serve as a valuable and insightful data source for documenting the work that principals actually do. These artifacts can be organized as portfolios or document logs as a formal aspect of the data collection system. Various school divisions call the principals' own documentation of their work by various names, but the purpose is essentially the same – to provide evidence of leadership excellence.

Documentation provides evaluators with information related to specific standards and provides principals with an opportunity for self-reflection, demonstration of quality work, and a basis for two-way communication with their evaluators. Documentation can confirm a principal's effort to document exemplary performance, can show continuing work at a proficient level, or can demonstrate progress in response to a previously identified deficiency.

Artifacts are not created solely for a portfolio or document log, but are readily reviewed in portfolio/document log form. They should provide evidence of one or more of the performance standards. Each artifact may include a caption since the artifact will be viewed in a context other than that for which it was developed. Within that binder or folder, principals may organize the material in any way they see fit; however, the emphasis should be on the quality of work, not the quantity of materials presented.

### **Portfolios**

The professional portfolio is an organized collection of work that demonstrates the educator's skills, talents, and accomplishments for the evaluation cycle. It contains a broader, more comprehensive collection of material than does a document log, and the selection of material to be included is often at the discretion of the principal. The portfolio provides an opportunity to demonstrate professional competence with regard to meeting performance standards and is therefore an important part of the evaluation process. Written analysis and reflection about artifacts should be included in the portfolio to provide insight into the rationale for the events and process documented in each entry. The portfolio is an official document that is maintained by the principal and reviewed periodically by the evaluator. It is the property of the principal and follows the principal when work assignments change. The division should provide the guidelines for the portfolio and may provide the physical notebook, cover, and dividers if it is to be submitted in hard copy.

A sample of the table of contents for a portfolio is provided on the next page. The principal may complete a table of contents for each performance standard including the activity names and any comments and place the artifacts immediately behind it.

## Document Logs

Document logs are similar in many ways to portfolios, yet are typically more concise. They tend to contain a more confined collection of specific artifacts, sometimes containing just those documents required by the school division.

A sample *Documentation Cover Sheet* is provided on the following page. This sheet is designed to help a principal organize documents. Also, the sheet provides examples of the types of material a principal might consider providing to show evidence of proficiency in the seven performance standards.

While the preceding paragraphs have referred to the principal providing his or her own documentation as evidence of meeting the performance standards, evaluators are free to maintain their own documentation (e.g., evaluator notes or a running record) relative to the principal's performance. This type of evaluator documentation may come from a variety of sources such as those mentioned in the *Informal Observation* section (informally observing the principal during meetings, watching his or her interactions with others, etc.). This type of documentation should be considered along with the principal's own documentation when making formative and summative assessments. As such, evaluators should write comments related to their own documentation on the *Formative Assessment Form* or the *Summative Assessment Form*, as applicable.

## SAMPLE Documentation Cover Sheet

*Directions: The principal should list the items he or she plans to submit as documentation of meeting each performance standard to supplement evidence gathered through other means. This form is optional. Documentation also may need to be supplemented with conversation, discussion, and/or annotations to clarify the principal's practice and process for the evaluator.*

## Teacher/Staff Surveys

Surveys are an important data collection tool used to gather client (in this instance, teacher/staff) data regarding their perceptions of the principal's performance. Among the advantages of using a survey design include the rapid turnaround in data collection, the limited cost in gathering the data, and the ability to infer perceptions of a larger population from smaller groups of individuals.

One of the benefits of using surveys is that the collected information may help the principal set goals for continuous improvement (i.e., for formative evaluation) — in other words, to provide feedback directly to the principal for professional growth and development. Teacher/staff surveys also may be used to provide information to evaluators that may not be accurately obtained through other types of documentation.

Principals should administer annual teacher/staff surveys according to school division guidelines during a specified time period (for example, the second nine weeks). The principal will retain sole access to the teacher/staff surveys; however, the principal will provide a summary of the surveys to the evaluator as part of the portfolio/document log.

The survey asks teachers/staff to report on items that they have directly experienced. The survey questions address the first six of the leader performance standards. At the principal's discretion, additional questions may be added to the survey. The table of specifications in Figure 3.3 illustrates the alignment between the survey items and performance standards.

## **Part 4: Connecting Principal Performance to Student Academic Progress**

Research in the field has consistently revealed that school leadership has an impact on student achievement gains or progress over years.<sup>20</sup> Simply stated, a school with strong leadership can have a positive effect on student learning, whereas a school with ineffective leadership can negatively affect student achievement.<sup>21</sup> Research also strongly supports the argument that ineffective teachers negatively impact students' learning while effective teachers lead to higher student achievement growth. Principals represent a key component in this equation as they are charged with supporting and accurately evaluating teachers, and in many cases, are directly responsible for selecting and retaining them. Using measures of student academic progress to inform principal evaluation only makes sense because the most direct measure of teacher quality appears to be student achievement, and principals have a direct impact on teacher quality.

### **Why Connect Principal Performance to Student Academic Progress?**

There are many reasons for including student academic progress as part of the principal evaluation process.

- Principals have an indirect, but powerful, influence on student achievement. The effect is most apparent through principals' influence on those who directly interact with students in instructional settings.<sup>22</sup>
- Principals influence student achievement through their leadership style<sup>23</sup> and their influence on school climate.<sup>24</sup>
- Principals of schools with high student achievement empower teachers to focus on student achievement and to make their own decisions in the classroom.<sup>25</sup>
- A strong leader committed to education is a common element in schools with at-risk populations that exceed expectations for student achievement.<sup>26</sup>

### **Implementation Concerns**

The role of a principal requires a performance evaluation system that acknowledges the contextual nature and complexities of the job. When deciding to include student academic progress in principal evaluation, divisions need to be aware of several implementation concerns:

- The increased focus on using student learning measures in principal evaluation may be new for some principals and their evaluators. Thus, there may be initial concerns to this change in evaluation practices.
- Testing programs in many states and school divisions do not fully reflect the taught curriculum, and it is important to choose multiple measures that reflect the intended curriculum.
- While the Virginia Department of Education is providing progress (value) table data, this measure will only be calculated for teachers of grades 4-8 in reading and mathematics and in Algebra I through grade 9.

## Virginia Law

Virginia law requires principals, assistant principals, and teachers to be evaluated using measures of student academic progress. Section 22.1-294 of the *Code of Virginia* (Probationary terms of service for principals, assistant principals and supervisors; evaluation; reassigning principal, assistant principal or supervisor to teaching position) states, in part, the following:

- B. Each local school board shall adopt for use by the division superintendent clearly defined criteria for a performance evaluation process for principals, assistant principals, and supervisors that are consistent with the performance objectives set forth in the *Guidelines for Uniform Performance Standards and Evaluation Criteria for Teachers, Administrators, and Superintendents* as provided in § 22.1-253.13:5 and that includes, among other things, an assessment of such administrators' skills and knowledge; **student academic progress** [emphasis added] and school gains in student learning; and effectiveness in addressing school safety and enforcing student discipline. The division superintendent shall implement such performance evaluation process in making employment recommendations to the school board pursuant to § 22.1-293.

## Methods for Connecting Student Performance to Principal Evaluation

The *Uniform Performance Standards and Evaluation Criteria* incorporate student academic progress as a significant component of the evaluation while encouraging local flexibility in implementation. These guidelines recommend that student academic progress account for 40 percent of a principal's summative evaluation. There are three key points to consider in this model:

1. Student learning, as determined by multiple measures of student academic progress, accounts for a total of 40 percent of the evaluation.
2. For elementary and middle school principals:
  - At least 20 percent of the principal evaluation (half of the student academic progress measure) is comprised of progress (value) table data in the school as provided by the Virginia Department of Education when the data are available and can be used appropriately.<sup>27</sup>
  - Another 20 percent of the principal evaluation (half of the student academic progress measure) should be measured using *Student Academic Progress Goals* with evidence that the alternative measure is valid. **Note:** Whenever possible, it is recommended that the second progress measure be grounded in validated, quantitative, objective measures, using tools already available in the school. These should include improvement in achievement measures (e.g., Standards of Learning assessment results, state benchmarks) for the school.
3. For high school principals: The entire 40 percent of the principal evaluation should be measured using *Student Academic Progress Goals* with evidence that the alternative measure is valid. These should include improvement in achievement measures (e.g., Standards of Learning assessment results, state benchmarks) for the school.

Figure 4.1 provides guidance for incorporating multiple measures of student academic progress into principals' performance evaluations.

Figure 4.1: *Guidance for Incorporating Multiple Measures of Student Academic Progress into Principal Performance Evaluations*

Principal	Application of Progress Table Data	Other Academic Progress Measures
Elementary School and Middle School	Twenty (20) percent of the total evaluation based on progress table data*	Twenty (20) percent of the total evaluation based on other measures of student academic progress. <ul style="list-style-type: none"> <li>• Quantitative measures already available in the school that are validated and provide measures of growth (as opposed to absolute achievement) should be given priority.</li> <li>• Goal setting should incorporate data from valid achievement measures (e.g., SOL assessment results, state benchmarks) that focus on school improvement whenever possible.</li> </ul>
High School	Not applicable	Forty (40) percent of the total evaluation based on measures of student academic progress other than the progress table data. <ul style="list-style-type: none"> <li>• Quantitative measures already available in the school that are validated and provide measures of growth (as opposed to absolute achievement) should be given priority. However, school improvement in absolute achievement can be used as an indicator for overall student academic progress.</li> <li>• Goal setting should incorporate data from valid achievement measures (e.g., SOL assessment results, state benchmarks) that focus on school improvement whenever possible.</li> </ul>

\* When there are not sufficient progress table data to be representative of students in the school, it may be appropriate to use progress table data as one component of the student academic progress standard but at less than 20 percent of the full evaluation, incorporating other validated quantitative measures of growth.

## Goal Setting

One approach to linking student academic progress to principal performance involves building the capacity for principals and their supervisors to interpret and use student achievement data to set target goals for student improvement. Setting goals — not just any goals, but goals set squarely on student performance — is a powerful way to enhance professional performance and, in turn, positively impact student academic progress. *Student Academic Progress Goal Setting* is designed to improve student learning.

In many cases, measures of student performance can be directly documented. A value-added or gain score approach can be summarized using the equation in Figure 4.2.

Figure 4.2: *Gain Score Equation*

***Goal Setting Process***

Principals are responsible for setting professional growth goals that are tied directly to school improvement and improved student academic progress and/or to the school’s strategic plans that are developed and updated regularly. The number of goals set should not be so numerous that there are too many goals to reach; therefore, diminishing the resources and focus brought to reaching each goal. The evaluator and the principal meet to discuss the baseline data and review the annual goals. New goals are identified each year. The goal should be customized for the particular school and its particular student population. The principal’s and school goals should be aligned with division goals and the school improvement process. In fact, a strong school improvement process is synonymous to the goal setting process. The *Student Academic Progress Goal Setting Form* on the following pages may be used for developing and assessing each annual goal. Goals should be measured at the beginning of the year, at mid-year, and at the end of the year to determine the measurable difference. In addition, there should be annual reporting and updates on annual goals and targets.

Goal setting involves several steps, beginning with knowing where students as a whole are in relation to what is expected of them. Then, principals can set specific, measurable goals based on both the demands of the curriculum and the needs of the students. The next part of the process is recursive in that the principal creates and implements strategies and monitors progress, and then makes adjustments to the strategies, as needed. Finally, a summative judgment is made regarding goal attainment over a specific period of time. Figure 4.3 depicts these steps.

Figure 4.3: *Goal Setting Process*<sup>28</sup>

***Examples of Measures of Student Academic Progress***

To be able to measure goal attainment, principals must identify valid measures of student academic progress appropriate to their school settings. Below are suggested focus areas for goal

setting (not intended as an exhaustive list and each school division/school should determine valid measures that are appropriate for each unique school setting) that provide measures of student academic progress that focus on school improvement:

### **Possible Examples of Measures**

- Pattern of improvement in SOL assessment pass rates
- Pattern of improvement in subgroup achievement on SOL assessments
- Pattern of improvement across grade levels on SOL assessments
- Decrease in achievement gaps between and among subgroups on SOL assessments
- Pattern of improvement in advanced pass rates on SOL assessments
- Decrease in the number/percent of children at risk of not learning to read by grade 3 (e.g., from fall to spring each year, reduce the percent of children failing to meet Phonological Awareness Literacy Screening [PALS] benchmarks for being on track to be proficient in reading by grade 3)
- Decrease in achievement gaps, as identified by PALS, between and among subgroups of students identified for reading intervention in grades K-2 and of students identified as meeting the High Benchmark status in spring of grade one
- Increase in the percentage of students meeting the PALS benchmark for Concept of Word in spring of kindergarten
- Increase in the percentage of students making at least one year's growth in Instructional Oral Reading Level, as measured by PALS or other valid reading assessments, in grades one through three
- Increase in the percentage of elementary students successfully meeting Curriculum Based Measurement benchmarks in English/reading, mathematics, science, and history and social science
- Decrease in the percentage of K-2 retentions by demonstrating more students are meeting or exceeding grade-level expectations
- Increase in the number/percent of students with disabilities meeting their Individualized Education Plan (IEP) goals
- Increase in the percentage of English Learners (ELs) making progress or proficiency on the English Language Proficiency assessment and increase the percentage of ELs achieving proficiency on English/reading and mathematics SOL assessments
- Pattern of improvement on formative assessments
- Pattern of increased percentage of first- through third-grade students reading on grade level
- Pattern of increased percentage of middle school students taking high school level courses
- Increase in examples of nonacademic core middle or high school classes or students receiving prestigious awards on a consistent basis (e.g., art, music, band, speech)

- Pattern of increased percentage of students who receive a high school diploma
- Increase in the number of students enrolled in college-level courses
- Pattern of increased number of students earning college credit while in high school
- Increase in the number/percentage of students in underperforming subgroups who enroll in college-level courses in high school
- Increase in the number/percentage of students in underperforming subgroups who earn college credit while in high school
- Increase in the number/percentage of students, particularly students from underperforming subgroups, who enroll in and are successful taking Algebra I by eighth grade
- Decrease in the percentage of students who leave eighth grade at risk of not graduating from high school with a Standard or Advanced Studies diploma
- Pattern of increased attainment of advanced diplomas
- Pattern of increased number of high school students earning career and technical industry certifications, state licenses, or successful national occupational assessment credentials
- Increase in the percent of students taking the SATs
- Increase in the percent of minority students taking Advanced Placement/dual enrollment courses
- Increase in the number/percent of students involved in one or more extracurricular activities

Quantitative measures of student academic progress based on validated achievement measures that already are being used locally should be the first data considered when determining local progress measures; other measures are recommended for use when two valid and direct measures of student academic progress are not available.

### ***Developing Goals***

Goals are developed early in the school year. The goals describe observable behavior and/or measurable results that would occur when a goal is achieved. The acronym SMART (Figure 4.4) is a useful way to self-assess a goal's feasibility and worth.

Figure 4.4: *Acronym for Developing Goals*

<b>S</b> pecific:	The goal is focused.
<b>M</b> easurable:	An appropriate instrument/measure is selected to assess the goal.
<b>A</b> ppropriate:	The goal is within the principal's control to effect change.
<b>R</b> ealistic:	The goal is feasible for the principal and/or school.
<b>T</b> ime limited:	The goal is contained within a single school year.

### ***Submission of the Goal Setting Form***

Principals complete a draft of their goals and schedule a meeting with their evaluators to look at the baseline data and discuss the proposed goal. Each year principals are responsible for submitting their goals to their evaluator early in the school year.

### ***Mid-Year Review of Goal***

A mid-year review of progress toward the goal is held for all principals. At the evaluator's discretion, this review may be conducted through peer teams or in another format that promotes discussion, collegiality, and reflection. The mid-year review should be held prior to March 1. It is the evaluator's responsibility to establish the format and select the time of the review.

### ***End-of-Year Review of Goal***

By the appropriate date, as determined by the evaluator, each principal is responsible for assessing the professional growth made on the goal and for submitting documentation to the evaluator. A principal may find it beneficial to draft the next year's goal as part of the reflection process in the event the goal has to be continued and/or revised. By mutual agreement, evaluators and individual principals may extend the due date for the end-of-year reviews in order to include the current year's data. In addition, as noted in the measures of academic achievement/growth noted on the previous page, data from previous years may be used to demonstrate a pattern toward attainment of goals.

## **Part 5: Rating Principal Performance**

The role of a principal requires a performance evaluation system that acknowledges the contextual nature and complexities of the job. For an evaluation system to be meaningful, it must provide its users with relevant and timely feedback. To facilitate this, evaluators should conduct both formative and summative evaluations of principals. While the superintendent has the ultimate responsibility for ensuring that the evaluation system is executed faithfully and effectively in the division, other division administrators may be designated by the evaluator to supervise, monitor, and assist with the multiple data source collection which will be used for these evaluations.

### **Interim Evaluation**

Some principal evaluation systems include an interim or annual review, especially for beginning principals, in order to provide systematic feedback prior to the completion of a summative evaluation. The multiple data sources discussed in Part 3 are used to compile a *Principal Interim/Annual Performance Report* that indicates if a principal has shown evidence of each of the performance standards. The evaluator should share his or her assessment of the principal's performance by a given date (for example, the last school day before winter break). *Please note that the Principal Interim/Annual Performance Report is used to document evidence of meeting the seven standards, but does not include a rating of performance.* A sample *Principal Interim/Annual Performance Report* is provided on the next several pages. This form is optional, and its use should be decided on by the local school division.

**SAMPLE Principal Interim/Annual Performance Report**

*Note: This is an optional report. Local school divisions should determine its use.*

*Directions: Evaluators use this form to maintain a record of evidence documented for each performance standard. Evidence can be drawn from informal observations, portfolio/document log review, and other appropriate sources. Evaluators may choose to use the “Evident” or “Not Evident” boxes provided under each standard to assist with documenting the principal’s progress towards meeting the standard. This form should be maintained by the evaluator during the course of the evaluation cycle. This report is shared at a meeting with the principal held within appropriate timelines.*

## **Summative Evaluation**

Assessment of performance quality occurs only at the summative evaluation stage, which comes at the end of the evaluation cycle. The ratings for each performance standard are based on multiple sources of information and are completed only after pertinent data from all sources are reviewed. The integration of data provides the evidence used to determine the performance ratings for the summative evaluations for all principals.

There are two major considerations in assessing job performance during summative evaluation: 1) the actual performance standards, and 2) how well they are performed. The performance standards and performance indicators provide a description of well-defined expectations.

## **Definitions of Ratings**

The rating scale provides a description of four levels of how well the standards (i.e., duties) are performed on a continuum from “Exemplary” to “Unacceptable.” The use of the scale enables evaluators to acknowledge effective performance (i.e., “Exemplary” and “Proficient”) and provides two levels of feedback for principals not meeting expectations (i.e., “Developing/Needs Improvement” and “Unacceptable”). The definitions in Figure 5.1 offer general descriptions of the ratings. *PLEASE NOTE: Ratings are applied to the seven performance standards and as an overall summative rating, not to performance indicators.*

Figure 5.1: *Definitions of Terms Used in Rating Scale*

Cat.	Description	Definition
Exemplary	The principal performing at this level maintains performance, accomplishments, and behaviors that consistently and considerably surpass the established performance standard and does so in a manner that exemplifies the school’s mission and goals. This rating is reserved for performance that is truly exemplary and is demonstrated with significant student academic progress.	<p>Exceptional performance:</p> <ul style="list-style-type: none"> <li>• sustains high performance over the evaluation cycle</li> <li>• empowers teachers and students and consistently exhibits behaviors that have a strong positive impact on student academic progress and the school climate</li> <li>• serves as a role model to others</li> </ul>
Proficient	The principal meets the performance standard in a manner that is consistent with the school’s mission and goals and has a positive impact on student academic progress.	<p>Effective performance:</p> <ul style="list-style-type: none"> <li>• consistently meets the requirements contained in the job description as expressed in the evaluation criteria</li> <li>• engages teachers and exhibits behaviors that have a positive impact on student academic progress and the school climate</li> <li>• demonstrates willingness to learn and apply new skills</li> </ul>
Developing/ Needs Improvement	The principal is starting to exhibit desirable traits related to the standard, but has not yet reached the full level of proficiency expected or the principal’s performance is lacking in a particular area. The principal often performs less than required in the established performance standard or in a manner that is inconsistent with the school’s mission and goals and results in below average student academic progress.	<p>Below acceptable performance:</p> <ul style="list-style-type: none"> <li>• requires support in meeting the standards</li> <li>• results in less than expected quality of student academic progress</li> <li>• requires principal professional growth be jointly identified and planned between the principal and evaluator</li> </ul>
Unacceptable	The principal consistently performs below the established performance standard or in a manner that is inconsistent with the school’s mission and goals and results in minimal student academic progress.	<p>Ineffective performance:</p> <ul style="list-style-type: none"> <li>• does not meet the requirements contained in the job description as expressed in the evaluation criteria</li> <li>• results in minimal student academic progress</li> <li>• may contribute to a recommendation for the employee not being considered for continued employment</li> </ul>

## How a Performance Rubric Works

Evaluators have two tools to guide their judgments for rating principals’ performance for the summative evaluation: 1) the sample performance indicators, and 2) the performance rubric.

**Sample Performance Indicators**

Performance indicators are used in the evaluation system to identify, in observable behaviors, performance of the major job standards. They were introduced in Part 2, and examples are provided again in this section.

**Performance Rubric**

The performance rubric is a behavioral summary scale that describes acceptable performance levels for each of the seven performance standards. It states the measure of performance expected of principals and provides a general description of what a rating entails. The rating scale is applied to the summative evaluation of all principals. The performance rubrics guide evaluators in assessing *how well* a standard is performed. They are provided to increase reliability among evaluators and to help principals focus on ways to enhance their leadership practices. **Please note: The rating of “Proficient” is the expected level of performance.** Additionally, the recommended performance rubrics presented here may be modified at the discretion of school division decision makers.

Figure 5.2: Example of a Performance Rubric

<b>Exemplary</b> <i>In addition to meeting the requirements for Proficient...</i>	<b>Proficient</b> <i>Proficient is the expected level of performance.</i>	<b>Developing/ Needs Improvement</b>	<b>Unacceptable</b>
The principal actively and consistently employs innovative and effective leadership strategies that maximize student learning and result in a shared vision of teaching and learning that reflects excellence.	The principal fosters the success of all students by facilitating the development, communication, implementation, and evaluation of a shared vision of teaching and learning that leads to school improvement.	The principal inconsistently fosters the success of students by facilitating the development, communication, implementation, or evaluation of a shared vision of teaching and learning that leads to school improvement.	The principal does not foster the success of all students by facilitating the development, communication, implementation, or evaluation of a shared vision of teaching and learning that leads to school improvement.

## Performance Rubrics and Summative Evaluation

Evaluators make judgments about performance of the seven performance standards based on all available evidence. After collecting information gathered through multiple data sources, the evaluator applies the four-level rating scale to evaluate a principal’s performance on all standards for the summative evaluation. Therefore, the summative evaluation represents where the “preponderance of evidence” exists, based on various data sources. A sample *Principal Summative Performance Report* is provided later in this document. The results of the evaluation must be discussed with the principal at a summative evaluation conference.

Summative evaluations should be completed in compliance with the *Code of Virginia* and school division policy. Summative ratings should apply the rating for each of the seven performance standards, with the most significant weight given to Standard 7 - Student Academic Progress. This document suggests that school divisions weight each of the first six standards equally at 10 percent, and that Standard 7 account for 40 percent of the evaluation. In determining the final summative rating, the following approach could be used:

1. Apply numbers 1 (Unacceptable) through 4 (Exemplary) to the rating scale  
 Exemplary = 4  
 Proficient = 3  
 Developing/Needs Improvement = 2  
 Unacceptable = 1;
2. Calculate the weighted contribution of each standard to the summative evaluation; and
3. Add the weighted contribution to achieve the final summative evaluation.

The following tables provide two examples of how this approach would apply.

### Example of Weighted Calculations for Principal Performance Evaluation

Principal Performance Standard	Performance Rating	Points	Weight	Weighted Total (Points x Weight)
Standard 1	Exemplary	4	1	4
Standard 2	Proficient	3	1	3
Standard 3	Proficient	3	1	3
Standard 4	Proficient	3	1	3
Standard 5	Proficient	3	1	3
Standard 6	Exemplary	4	1	4
Standard 7	Exemplary	4	4	16
<b>Cumulative Summative Rating</b>				<b>36</b>

<b>Principal Performance Standard</b>	<b>Performance Rating</b>	<b>Points</b>	<b>Weight</b>	<b>Weighted Total (Points x Weight)</b>
Standard 1	Proficient	3	1	3
Standard 2	Developing/Needs Improvement	2	1	2
Standard 3	Proficient	3	1	3
Standard 4	Proficient	3	1	3
Standard 5	Proficient	3	1	3
Standard 6	Developing/Needs Improvement	2	1	2
Standard 7	Proficient	3	4	12
<b>Cumulative Summative Rating</b>				<b>28</b>

Divisions will have to determine the range of scores within the Cumulative Summative Rating that are indicative of “Exemplary,” “Proficient,” “Developing/Needs Improvement,” and “Unacceptable” performance. The Department of Education will provide guidelines for school divisions.

## Part 6: Improving Principal Performance

Supporting principals is essential to the success of schools. Many resources are needed to assist principals in growing professionally. Sometimes additional support is required to help principals develop so that they can meet the performance standards for their school.

There are two tools that may be used at the discretion of the evaluator. The first is the *Support Dialogue*, a division-level discussion between the evaluator and the principal. It is an optional process to promote conversation about performance in order to address specific needs or desired areas for professional growth. The second is the *Performance Improvement Plan* which has a more formal structure and is used for notifying a principal of performance that *requires* improvement due to less-than-proficient performance.

The tools may be used independently of each other. Figure 6.1 highlights key differences between the two processes.

Figure 6.1: *Two Tools to Increase Professional Performance*

	<b>Support Dialogue</b>	<b>Performance Improvement Plan</b>
<b>Purpose</b>	For principals who could benefit from targeted performance improvement OR who would like to systematically focus on his or her own performance growth	For principals whose work is in the “developing/needs improvement” “unacceptable” categories
<b>Initiates Process</b>	Evaluator or principal	Evaluator
<b>Documentation</b>	Form Provided: None  Memo or other record of the discussion/ other forms of documentation at the division level	Form Required: <i>Performance Improvement Plan</i>  Division level  Superintendent is notified
<b>Outcomes</b>	Performance improvement is documented with the support dialogue continued at the discretion of the evaluator or the principal  In some instances, little or no progress – the employee may be moved to a <i>Performance Improvement Plan</i> .	Sufficient improvement – recommendation to continue employment  Inadequate improvement, recommendation to continue on <i>Performance Improvement Plan</i> OR dismiss the employee

### Support Dialogue

The *Support Dialogue* is initiated by evaluators or principals at any point during the school year for use with personnel whose professional practice would benefit from additional support. It is designed to facilitate discussion about the area(s) of concern and ways to address those concerns. The *Support Dialogue* process should not be construed as applying to poor performing principals. The option for a *Support Dialogue* is open to any principal who desires assistance in a particular area.

During the initial conference, both parties share what each will do to support the principal's growth (see sample prompts in Figure 6.2) and decide when to meet again. To facilitate the improvements, they may choose to fill out the optional *Support Dialogue Form* on the following page. After the agreed-upon time to receive support and implement changes in professional practice has elapsed, the evaluator and principal meet again to discuss the impact of the changes (see sample follow-up prompts in Figure 6.2).

Figure 6.2: *Sample Prompts*

<p><b>Sample Prompts for the Initial Conversation</b></p> <p><i>What challenges have you encountered in addressing _____ (tell specific concern)?</i></p> <p><i>What have you tried to address the concern of _____ (tell specific concern)?</i></p> <p><i>What support can I or others in the division provide you?</i></p> <p><b>Sample Prompts for the Follow-Up Conversation</b></p> <p><i>Last time we met, we talked about _____ (tell specific concern). What has gone well?</i></p> <p><i>What has not gone as well?</i></p>
--

The entire *Support Dialogue* process is intended to be completed in a relatively short time period (for example, within a six-week period) as it offers targeted support. If the *Support Dialogue* was initiated by a principal seeking self-improvement, the evaluator and the principal may decide at any time either to conclude the process or to continue the support and allocate additional time or resources.

For principals for whom the evaluator initiated the *Support Dialogue*, the desired outcome would be that the principal's practice has improved to a proficient level. In the event that improvements in performance are still needed, the evaluator makes a determination either to extend the time of the *Support Dialogue* because progress has been made, or to allocate additional time or resources. If the necessary improvement is not made, the employee must be placed on a *Performance Improvement Plan*. Once placed on a *Performance Improvement Plan* the employee will have a specified time period (for example, 90 calendar days) to demonstrate that the identified deficiencies have been corrected.

## **Performance Improvement Plan**

If a principal's performance does not meet the expectations established by the school division, the principal will be placed on a *Performance Improvement Plan*. A *Performance Improvement Plan* is designed to support a principal in addressing areas of concern through targeted supervision and additional resources. It may be used by an evaluator at any point during the year for a principal whose professional practice would benefit from additional support. Additionally, a *Performance Improvement Plan* is implemented if one of the following scenarios occurs at the end of any data collection period:

- a principal receives two or more “Not Evident” ratings at the interim review;
- a rating of “Developing/Needs Improvement” on two or more performance standards; or
- a rating of “Unacceptable” on one or more performance standards or an overall rating of “Unacceptable.”

### ***Implementation of Performance Improvement Plan***

When a principal is placed on a *Performance Improvement Plan*, the evaluator must:

- a) provide written notification to the principal of the area(s) of concern that need(s) to be addressed;
- b) formulate a *Performance Improvement Plan* in conjunction with the principal; and
- c) review the results of the *Performance Improvement Plan* with the principal within established timelines.

Assistance may include:

- support from a professional peer or supervisor;
- conferences, classes, and workshops on specific topics; and/or
- other resources to be identified.

### ***Resolution of Performance Improvement Plan***

Prior to the evaluator making a final recommendation, the evaluator meets with the principal to review progress made on the *Performance Improvement Plan*, according to the timeline. The options for a final recommendation include:

- a) Sufficient improvement has been achieved; the principal is no longer on a *Performance Improvement Plan* and is rated “Proficient.”
- b) Partial improvement has been achieved but more improvement is needed; the principal remains on a *Performance Improvement Plan* and is rated “Developing/Needs Improvement.”
- c) Little or no improvement has been achieved; the principal is rated “Unacceptable.”

When a principal is rated “Unacceptable,” the principal may be recommended for dismissal. If not dismissed, a new *Performance Improvement Plan* will be implemented. Following completion of the *Performance Improvement Plan*, if the principal is rated “Unacceptable” a second time, the principal will be recommended for dismissal.

***Request for Review of an “Unacceptable” Rating***

The principal may request a review of the evidence in relation to an “Unacceptable” rating received on a Summative Evaluation or, as a result of a *Performance Improvement Plan*, in accordance with the policies and procedures of the school division.
