** A computer adaptive test is an online test that is customized for each student taking the test. A student's score is determined by the number of questions a student answers correctly and the relative difficulty of the questions answered. For more information about computer adaptive tests, go to:

http://www.doe.virginia.gov/testing/test_administration/cat/index.shtml

For more information about the adoption of cut scores and an explanation of why the number of correct answers associated with a scaled score of 400 (proficient) or 500 (advanced) may vary slightly as new versions of the test are developed, see the document "Explanation of Cut Scores" available at:
