INTRODUCTION

The *History and Social Science Standards of Learning Curriculum Framework 2008*, approved by the Board of Education on July 17, 2008, is a companion document to the 2008 *History and Social Science Standards of Learning for Virginia Public Schools*. The Curriculum Framework amplifies the Standards of Learning by defining the content understandings, knowledge, and skills that are measured by the Standards of Learning assessments. The Curriculum Framework provides additional guidance to school divisions and their teachers as they develop an instructional program appropriate for their students. It assists teachers in their lesson planning by identifying the essential content understandings, knowledge, and intellectual skills that should be the focus of instruction for each standard. Hence, the framework delineates with greater specificity the content that all teachers should teach and all students should learn.

The Curriculum Framework consists of at least one framework page for every Standard of Learning. Each of these pages is divided into four columns, as described below:

Essential Understandings

This column includes the fundamental background information necessary for answering the essential questions and acquiring the essential knowledge. Teachers should use these understandings as a basis for lesson planning.

Essential Questions

In this column are found questions that teachers may use to stimulate student thinking and classroom discussion. The questions are based on the standard and the essential understandings, but may use different vocabulary and may go beyond them.

Essential Knowledge

This column delineates the key content facts, concepts, and ideas that students should grasp in order to demonstrate understanding of the standard. This information is not meant to be exhaustive or a limitation on what is taught in the classroom. Rather, it is meant to be the principal knowledge defining the standard.

Essential Skills

This column enumerates the fundamental intellectual abilities that students should have—what they should be able to do—to be successful in accomplishing historical and geographical analysis and achieving responsible citizenship.

The Curriculum Framework serves as a guide for Standards of Learning assessment development; however, assessment items may not and should not be verbatim reflections of the information presented in the Curriculum Framework.

STANDARD VUS.1a, b, c, d, e, f, g, h, i

The student will demonstrate skills for historical and geographical analysis and responsible citizenship, including the ability to

- a) identify, analyze, and interpret primary and secondary source documents, records, and data, including artifacts, diaries, letters, photographs, journals, newspapers, historical accounts, and art, to increase understanding of events and life in the United States;**
- b) evaluate the authenticity, authority, and credibility of sources;**
- c) formulate historical questions and defend findings, based on inquiry and interpretation;**
- d) develop perspectives of time and place, including the construction of maps and various timelines of events, periods, and personalities in American history;**
- e) communicate findings orally and in analytical essays or comprehensive papers;**
- f) develop skills in discussion, debate, and persuasive writing with respect to enduring issues and determine how divergent viewpoints have been addressed and reconciled;**
- g) apply geographic skills and reference sources to understand how relationships between humans and their environment have changed over time;**
- h) interpret the significance of excerpts from famous speeches and other documents;**
- i) identify the costs and benefits of specific choices made, including the consequences, both intended and unintended, of the decisions and how people and nations responded to positive and negative incentives.**

The various skills identified in this standard are cited, as applicable, in the “Essential Skills” columns of the charts throughout this curriculum framework, with the exception of skills “e” and “f.” Students should have opportunities to practice communicating orally and in writing, discussing, debating, and persuading, but these skills will not be assessed on the Standards of Learning test. All other skills listed above will be assessed on the test, and teachers should incorporate them into instruction throughout the year.

STANDARD VUS.2

The student will describe how early European exploration and colonization resulted in cultural interactions among Europeans, Africans, and American Indians.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>Early European exploration and colonization resulted in the redistribution of the world's population as millions of people from Europe and Africa voluntarily and involuntarily moved to the New World.</p> <p>Exploration and colonization initiated worldwide commercial expansion as agricultural products were exchanged between the Americas and Europe. In time, colonization led to ideas of representative government and religious tolerance that over several centuries would inspire similar transformations in other parts of the world.</p>	<p>Why did Europeans settle in the English colonies?</p> <p>How did their motivations influence their settlement patterns and colony structures?</p> <p>In what ways did the cultures of Europe, Africa, and the Americas interact?</p> <p>What were the consequences of the interactions of European, African, and American cultures?</p>	<p>Characteristics of early exploration and settlements in the New World</p> <ul style="list-style-type: none"> • New England was settled by Puritans seeking freedom from religious persecution in Europe. They formed a “covenant community” based on the principles of the Mayflower Compact and Puritan religious beliefs and were often intolerant of those not sharing their religion. They also sought economic opportunity and practiced a form of direct democracy through town meetings. • The Middle Atlantic region was settled chiefly by English, Dutch, and German-speaking immigrants seeking religious freedom and economic opportunity. • Virginia and the other Southern colonies were settled by people seeking economic opportunities. Some of the early Virginia settlers were “cavaliers,” i.e., English nobility who received large land grants in eastern Virginia from the King of England. Poor English immigrants also came seeking better lives as small farmers or artisans and settled in the Shenandoah Valley or western Virginia, or as indentured servants who agreed to work on tobacco plantations for a period of time to pay for passage to the New World. • Jamestown, established in 1607 by the Virginia Company of London as a business venture, was the first permanent English settlement in North America. The Virginia House of Burgesses, established by the 1640s, was the first elected assembly in the New World. It has operated continuously and is known today as the General Assembly of Virginia. <p>Interactions among Europeans, Africans, and American Indians</p> <ul style="list-style-type: none"> • The explorations and settlements of the English in the American colonies and Spanish in the Caribbean, Central America, and South America, often led to violent conflicts with the American Indians. The Indians lost their traditional territories and fell victim to diseases carried from Europe. By contrast, French exploration of Canada did not lead to large-scale immigration from France, and relations with native peoples were generally more cooperative. • The growth of an agricultural economy based on large landholdings in the Southern colonies and in the Caribbean led to the introduction of slavery in the New World. The first Africans were brought against their will to Jamestown in 1619 to work on tobacco plantations. 	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. (VUS.1a)</p> <p>Formulate historical questions and defend findings, based on inquiry and interpretation. (VUS.1c)</p> <p>Develop perspectives of time and place. (VUS.1d)</p>

STANDARD VUS.3

The student will describe how the values and institutions of European economic and political life took root in the colonies and how slavery reshaped European and African life in the Americas.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>Economic and political institutions in the colonies developed in ways that were either typically European or were distinctively American, as climate, soil conditions, and natural resources shaped regional economic development.</p> <p>The African slave trade and the development of a slave labor system in many of the colonies resulted from plantation economies and labor shortages.</p>	<p>How did the economic activity and political institutions of the three colonial regions reflect the resources and/or the European origins of their settlers?</p> <p>Why was slavery introduced into the colonies?</p> <p>How did the institution of slavery influence European and African life in the colonies?</p>	<p>Economic characteristics of the Colonial Period</p> <ul style="list-style-type: none"> • The New England colonies developed an economy based on shipbuilding, fishing, lumbering, small-scale subsistence farming, and eventually, manufacturing. The colonies prospered, reflecting the Puritans’ strong belief in the values of hard work and thrift. • The middle colonies of New York, New Jersey, Pennsylvania, and Delaware developed economies based on shipbuilding, small-scale farming, and trading. Cities such as New York and Philadelphia began to grow as seaports and/or commercial centers. • Southern colonies developed economies in the eastern coastal lowlands based on large plantations that grew “cash crops” such as tobacco, rice, and indigo for export to Europe. Farther inland, however, in the mountains and valleys of the Appalachian foothills, the economy was based on small-scale subsistence farming, hunting, and trading. • A strong belief in private ownership of property and free enterprise characterized colonial life everywhere. <p>Social characteristics of the colonies</p> <ul style="list-style-type: none"> • New England’s colonial society was based on religious standing. The Puritans grew increasingly intolerant of dissenters who challenged the Puritans’ belief in the connection between religion and government. Rhode Island was founded by dissenters fleeing persecution by Puritans in Massachusetts. • The middle colonies were home to multiple religious groups who generally believed in religious tolerance, including Quakers in Pennsylvania, Huguenots and Jews in New York, and Presbyterians in New Jersey. These colonies had more flexible social structures and began to develop a middle class of skilled artisans, entrepreneurs (business owners), and small farmers. 	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. (VUS.1a)</p> <p>Formulate historical questions and defend findings, based on inquiry and interpretation. (VUS.1c)</p> <p>Develop perspectives of time and place. (VUS.1d)</p> <p>Apply geographic skills and reference sources to understand how relationships between humans and their environment have changed over time. (VUS.1g)</p> <p>Identify the costs and benefits of specific choices made, including the consequences, both intended and unintended, of the decisions and how people and nations responded to positive and negative incentives. (VUS.1i)</p>

STANDARD VUS.3 (continued)

The student will describe how the values and institutions of European economic and political life took root in the colonies and how slavery reshaped European and African life in the Americas.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
		<ul style="list-style-type: none"> • Virginia and the Southern colonies had a social structure based on family status and the ownership of land. Large landowners in the eastern lowlands dominated colonial government and society and maintained an allegiance to the Church of England and closer social ties to Britain than did those in the other colonies. In the mountains and valleys further inland, however, society was characterized by small subsistence farmers, hunters, and traders of Scots-Irish and English descent. • The “Great Awakening” was a religious movement that swept both Europe and the colonies during the mid-1700s. It led to the rapid growth of evangelical religions, such as Methodist and Baptist, and challenged the established religious and governmental orders. It laid one of the social foundations for the American Revolution. <p>Political life in the colonies</p> <ul style="list-style-type: none"> • New England colonies used town meetings (an “Athenian” direct democracy model) in the operation of government. • Middle colonies incorporated a number of democratic principles that reflected the basic rights of Englishmen. • Southern colonies maintained stronger ties with Britain, with planters playing leading roles in representative colonial legislatures. <p>The development of indentured servitude and slavery</p> <ul style="list-style-type: none"> • The growth of a plantation-based agricultural economy in the hot, humid coastal lowlands of the Southern colonies required cheap labor on a large scale. Some of the labor needs, especially in Virginia, were met by indentured servants, who were often poor persons from England, Scotland, or Ireland who agreed to work on plantations for a period of time in return for their passage from Europe or relief from debts. • Most plantation labor needs eventually came to be satisfied by the forcible importation of Africans. Although some Africans worked as indentured servants, earned their freedom, and lived as free citizens during the Colonial Era, over time larger and larger numbers of enslaved Africans were forcibly brought to the Southern colonies (the “Middle Passage”). • The development of a slavery-based agricultural economy in the Southern colonies eventually led to conflict between the North and South and the American Civil War. 	

STANDARD VUS.4a

The student will demonstrate knowledge of events and issues of the Revolutionary Period by

a) analyzing how the political ideas of John Locke and those expressed in *Common Sense* helped shape the Declaration of Independence.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>New political ideas about the relationship between people and their government helped to justify the Declaration of Independence.</p> <p>The revolutionary generation formulated the political philosophy and laid the institutional foundations for the system of government under which American's live.</p> <p>The American Revolution was inspired by ideas concerning natural rights and political authority, and its successful completion affected people and governments throughout the world for many generations.</p>	<p>How did the ideas of John Locke and Thomas Paine influence Jefferson's writings in the Declaration of Independence?</p>	<p>The ideas of John Locke</p> <p>The period known as the "Enlightenment" in Europe during the seventeenth and eighteenth centuries saw the development of new ideas about the rights of people and their relationship to their rulers. John Locke was an Enlightenment philosopher whose ideas, more than any other's, influenced the American belief in self-government. Locke wrote that:</p> <ul style="list-style-type: none"> • All people are free, equal, and have "natural rights" of life, liberty, and property that rulers cannot take away. • All original power resides in the people, and they consent to enter into a "social contract" among themselves to form a government to protect their rights. In return, the people promise to obey the laws and rules established by their government, establishing a system of "ordered liberty." • Government's powers are limited to those the people have consented to give to it. Whenever government becomes a threat to the people's natural rights, it breaks the social contract, and the people have the right to alter or overthrow it. • Locke's ideas about the sovereignty and rights of the people were radical and challenged the centuries-old practice throughout the world of dictatorial rule by kings, emperors, and tribal chieftains. <p>Thomas Paine and <i>Common Sense</i></p> <ul style="list-style-type: none"> • Thomas Paine was an English immigrant to America who produced a pamphlet known as <i>Common Sense</i> that challenged the rule of the American colonies by the King of England. <i>Common Sense</i> was read and acclaimed by many American colonists during the mid-1700s and contributed to a growing sentiment for independence from Great Britain. 	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. (VUS.1a)</p> <p>Formulate historical questions and defend findings, based on inquiry and interpretation. (VUS.1c)</p> <p>Develop perspectives of time and place. (VUS.1d)</p> <p>Interpret the significance of excerpts from famous speeches and other documents. (VUS.1h)</p>

STANDARD VUS.4a (continued)

The student will demonstrate knowledge of events and issues of the Revolutionary Period by

a) analyzing how the political ideas of John Locke and those expressed in *Common Sense* helped shape the Declaration of Independence.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
		<p>The Declaration of Independence The eventual draft of the Declaration of Independence, authored by Thomas Jefferson of Virginia, reflected the ideas of Locke and Paine. Jefferson wrote:</p> <ul style="list-style-type: none"> • “We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness. • “That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, • “That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or abolish it, and to institute new Government...” <p>Jefferson then went on to detail many of the grievances against the King of England that Paine had earlier described in <i>Common Sense</i>.</p>	

STANDARD VUS.4b

The student will demonstrate knowledge of events and issues of the Revolutionary Period by

b) evaluating how key principles in the Declaration of Independence grew in importance to become unifying ideas of American democracy.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>The ideals expressed in the Declaration of Independence contradicted the realities of slavery and the undemocratic nature of political participation in the early decades of the new republic.</p>	<p>How did the Declaration of Independence become a road map for the new republic as it extended the franchise, provided for equality of opportunity, and guaranteed “unalienable rights”?</p>	<p>The key principles of the Declaration of Independence increased political, social, and economic participation in the American experience over a period of time.</p> <ul style="list-style-type: none">• Political participation (equality)<ul style="list-style-type: none">– Extending the franchise– Upholding due process of law– Providing free public education• Social participation (liberty)<ul style="list-style-type: none">– Abolishing slavery– Extending civil rights to women and other groups• Economic participation (pursuit of happiness)<ul style="list-style-type: none">– Regulating the free enterprise system– Promoting economic opportunity– Protecting property rights	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. STANDARD VUS.4c

The student will demonstrate knowledge of events and issues of the Revolutionary Period by
 c) describing the political differences among the colonists concerning separation from Great Britain.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>The ideas of the Enlightenment and the perceived unfairness of British policies provoked debate and resistance by the American colonists.</p>	<p>What differences existed among Americans concerning separation from Great Britain?</p>	<p>Anglo-French rivalry leading to conflict with the colonies</p> <ul style="list-style-type: none"> • The rivalry in North America between Britain and France led to the French and Indian War, in which the French were driven out of Canada and their territories west of the Appalachian Mountains. • As a result of the war, Britain took several actions that angered the American colonies and led to the American Revolution. These included <ul style="list-style-type: none"> – the Proclamation of 1763, which prohibited settlement west of the Appalachian Mountains, a region that was costly for the British to protect. – new taxes on legal documents (the “Stamp Act”), tea, and sugar, to pay costs incurred during the French and Indian War and for British troops to protect colonists. <p>The beginning of the American Revolution Resistance to British rule in the colonies mounted, leading to war:</p> <ul style="list-style-type: none"> • The Boston Tea Party occurred. • The First Continental Congress was called, to which all of the colonies except Georgia sent representatives—the first time most of the colonies had acted together. • The Boston Massacre took place when British troops fired on anti-British demonstrators. • War began when the “Minutemen” in Massachusetts fought a brief skirmish with British troops at Lexington and Concord. <p>Differences among the colonists The colonists were divided into three main groups during the Revolution:</p> <ul style="list-style-type: none"> • Patriots <ul style="list-style-type: none"> – Believed in complete independence from Britain – Inspired by the ideas of Locke and Paine and the words of Virginian Patrick Henry (“Give me liberty, or give me death!”) – Provided the troops for the American Army, led by Virginian George Washington • Loyalists (Tories) <ul style="list-style-type: none"> – Remained loyal to Britain because of cultural and economic ties – Believed that taxation of the colonies was justified to pay for British troops to protect American settlers from Indian attacks • Neutrals <ul style="list-style-type: none"> – The many colonists who tried to stay as uninvolved in the war as possible 	<p>Evaluate the authenticity, authority, and credibility of sources. STANDARD VUS.4d

The student will demonstrate knowledge of events and issues of the Revolutionary Period by

d) analyzing reasons for colonial victory in the Revolutionary War.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>The American rebels won their independence because the British government grew tired of the struggle soon after the French agreed to help the Americans.</p>	<p>What factors contributed to the victory of the American rebels?</p>	<p>Factors leading to colonial victory</p> <ul style="list-style-type: none">• Diplomatic<ul style="list-style-type: none">– Benjamin Franklin negotiated a Treaty of Alliance with France.– The war did not have popular support in Great Britain.• Military<ul style="list-style-type: none">– George Washington, general of the American army, avoided any situation that threatened the destruction of his army, and his leadership kept the army together when defeat seemed inevitable.– Americans benefited from the presence of the French army and navy at the Battle of Yorktown, which ended the war with an American victory.	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. STANDARD VUS.5a

The student will demonstrate knowledge of the issues involved in the creation and ratification of the Constitution of the United States and how the principles of limited government, consent of the governed, and the social contract are embodied in it by

a) explaining the origins of the Constitution, including the Articles of Confederation.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
During the Constitutional Era, the Americans made two attempts to establish a workable government based on republican principles.	<p>How did America's pre-Revolutionary relationship with Britain influence the structure of the first national government?</p> <p>What weaknesses in the Articles of Confederation led to the effort to draft a new constitution?</p>	<p>American political leaders, fearful of a powerful central government like Britain's, created the Articles of Confederation, adopted at the end of the war.</p> <p>The Articles of Confederation</p> <ul style="list-style-type: none">• Provided for a weak national government• Gave Congress no power to tax or regulate commerce among the states• Provided for no common currency• Gave each state one vote regardless of size• Provided for no executive or judicial branch	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. STANDARD VUS.5b

The student will demonstrate knowledge of the issues involved in the creation and ratification of the Constitution of the United States and how the principles of limited government, consent of the governed, and the social contract are embodied in it by

b) identifying the major compromises necessary to produce the Constitution, and the roles of James Madison and George Washington.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>The Constitution of the United States established a government that shared power between the national government and state governments, protected the rights of states, and provided a system for orderly change through amendments to the Constitution itself.</p>	<p>How did the delegates to the Constitutional Convention balance competing interests?</p> <p>What compromises were reached at the Constitutional Convention?</p>	<p>Key issues and their resolutions</p> <ul style="list-style-type: none"> • Made federal law the supreme law of the land when constitutional, but otherwise gave the states considerable leeway to govern themselves • Balanced power between large and small states by creating a Senate, where each state has two senators, and a House of Representatives, where membership is based on population • Placated the Southern states by counting slaves as three-fifths of the population when determining representation in the United States House of Representatives • Avoided a too-powerful central government by establishing three co-equal branches—legislative, executive, and judicial—with numerous checks and balances among them • Limited the powers of the federal government to those identified in the Constitution <p>Key leaders</p> <ul style="list-style-type: none"> • George Washington, president of the Convention <ul style="list-style-type: none"> – Washington presided at the Convention and, although seldom participating in the debates, lent his enormous prestige to the proceedings. • James Madison, “Father of the Constitution” <ul style="list-style-type: none"> – Madison, a Virginian and a brilliant political philosopher, often led the debate and kept copious notes of the proceedings—the best record historians have of what transpired at the Constitutional Convention. – At the Convention, he authored the “Virginia Plan,” which proposed a federal government of three separate branches (legislative, executive, judicial) and became the foundation for the structure of the new government. – He later authored much of the Bill of Rights. 	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. (VUS.1a)</p> <p>Formulate historical questions and defend findings, based on inquiry and interpretation. (VUS.1c)</p>

STANDARD VUS.5c

The student will demonstrate knowledge of the issues involved in the creation and ratification of the Constitution of the United States and how the principles of limited government, consent of the governed, and the social contract are embodied in it by

c) examining the significance of the Virginia Declaration of Rights and the Virginia Statute for Religious Freedom in the framing of the Bill of Rights.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>The major principles of the Bill of Rights of the Constitution were based on earlier Virginia statutes.</p>	<p>How was the Bill of Rights influenced by the Virginia Declaration of Rights and the Virginia Statute for Religious Freedom?</p>	<p>Virginia Declaration of Rights (George Mason)</p> <ul style="list-style-type: none"> Reiterated the notion that basic human rights should not be violated by governments <p>Virginia Statute for Religious Freedom (Thomas Jefferson)</p> <ul style="list-style-type: none"> Outlawed the established church—that is, the practice of government support for one favored church <p>Bill of Rights</p> <ul style="list-style-type: none"> James Madison consulted the Virginia Declaration of Rights and the Virginia Statute for Religious Freedom when drafting the amendments that eventually became the United States Bill of Rights. 	<p>Identify, analyze, and interpret primary and secondary source documents, records, and data to increase understanding of events and life in the United States. STANDARD VUS.5d

The student will demonstrate knowledge of the issues involved in the creation and ratification of the Constitution of the United States and how the principles of limited government, consent of the governed, and the social contract are embodied in it by

d) assessing the arguments of Federalists and Anti-Federalists during the ratification debates and their relevance to political debate today.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
Elements of Federalist and Anti-Federalist thought are reflected in contemporary political debate on issues such as the size and role of government, federalism, and the protection of individual rights.	<p>What were the major arguments for and against the Constitution of 1787 in the leading Federalist and Anti-Federalist writings and in the ratification debates?</p> <p>Who were the leading Federalists and Anti-Federalists in the pivotal ratification debate in Virginia?</p>	<p>Federalists advocated the importance of a strong central government, especially to promote economic development and public improvements. Today, those who see a primary role for the federal government in solving national problems are heirs to this tradition.</p> <p>Anti-Federalists feared an overly powerful central government destructive of the rights of individuals and the prerogatives of the states. Today, the more conservative thinkers echo these concerns and champion liberty, individual initiative, and free markets.</p> <p>The leading Virginia opponents of ratification were Patrick Henry and George Mason; the leading Virginia proponents of ratification were George Washington and James Madison.</p>	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. STANDARD VUS.5e

The student will demonstrate knowledge of the issues involved in the creation and ratification of the Constitution of the United States and how the principles of limited government, consent of the governed, and the social contract are embodied in it by

- e) appraising how John Marshall's precedent-setting decisions established the Supreme Court as an independent and equal branch of the national government.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
Important legal precedents established by the Marshall Court strengthened the role of the United States Supreme Court as an equal branch of the national government.	How did Chief Justice John Marshall, a Virginian, contribute to the growth of the United States Supreme Court's importance in relation to the other branches of the national government?	The doctrine of judicial review set forth in <i>Marbury v. Madison</i> , the doctrine of implied powers set forth in <i>McCulloch v. Maryland</i> , and a broadly national view of economic affairs set forth in <i>Gibbons v. Ogden</i> are the foundation blocks of the Supreme Court's authority to mediate disagreements between branches of governments, levels of government, and competing business interests.	Formulate historical questions and defend findings, based on inquiry and interpretation. (VUS.1c) Develop perspectives of time and place. (VUS.1d)

STANDARD VUS.6a

The student will demonstrate knowledge of the major events from the last decade of the eighteenth century through the first half of the nineteenth century by

a) explaining the principles and issues that prompted Thomas Jefferson to organize the first opposition political party.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>Different views of economic and foreign policy issues led to the development of the first American political parties.</p>	<p>Why did competing political parties develop during the 1790s?</p>	<p>Controversy over the Federalists' support for the Bank of the United States, the Jay Treaty, and the undeclared war on France contributed to the emergence of an organized opposition party, the Democratic-Republicans, led by Thomas Jefferson and James Madison.</p> <p>The presidential election of 1800, won by Thomas Jefferson, was the first American presidential election in which power was peacefully transferred from one political party to another.</p> <p>The Federalists, led by John Adams and Alexander Hamilton, typically believed in a strong national government and commercial economy. They were supported by bankers and business interests in the Northeast.</p> <p>The Democratic-Republicans believed in a weak national government and an agricultural economy. They were supported by farmers, artisans, and frontier settlers in the South.</p>	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. STANDARD VUS.6b

The student will demonstrate knowledge of the major events from the last decade of the eighteenth century through the first half of the nineteenth century by

b) identifying the economic, political, and geographic factors that led to territorial expansion and its impact on the American Indians.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
<p>Economic and strategic interests, supported by popular beliefs, led to territorial expansion to the Pacific Ocean.</p> <p>The new American republic prior to the Civil War experienced dramatic territorial expansion, immigration, economic growth, and industrialization. Americans, stirred by their hunger for land and the ideology of “Manifest Destiny,” flocked to new frontiers.</p> <p>Conflicts between American settlers and Indian nations in the Southeast and the old Northwest resulted in the relocation of many Indians to reservations.</p>	<p>What factors influenced American westward movement?</p>	<p>Expansion resulting from the Louisiana Purchase and War of 1812</p> <ul style="list-style-type: none"> • Thomas Jefferson, as president in 1803, purchased the huge Louisiana Territory from France, which doubled the size of the United States overnight. He authorized the Lewis and Clark expedition to explore the new territories that lay west of the Mississippi River. Sacajawea, an American Indian woman, served as their guide and translator. • The American victory over the British in the War of 1812 produced an American claim to the Oregon Territory and increased migration of American settlers into Florida, which was later acquired by treaty from Spain. • The Monroe Doctrine (1823) stated the following: <ul style="list-style-type: none"> – The American continents should not be considered for future colonization by any European powers. – Nations in the Western Hemisphere were inherently different from those of Europe—i.e., they were republics by nature rather than monarchies. – The United States would regard as a threat to its own peace and safety any attempt by European powers to impose their system on any independent state in the Western Hemisphere. – The United States would not interfere in European affairs. 	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. The Texans’ eventual victory over Mexican forces subsequently brought Texas into the United States.• The American victory in the Mexican War during the 1840s led to the acquisition of an enormous territory that included the present-day states of California, Nevada, Utah, Arizona, and parts of Colorado and New Mexico. <p>Impact on the American Indians</p> <ul style="list-style-type: none">• The belief that it was America’s “Manifest Destiny” to stretch from the Atlantic to the Pacific provided political support for territorial expansion.• During this period of westward migration, American Indians were repeatedly defeated in violent conflicts with settlers and soldiers and forcibly removed from their ancestral homelands. He believed that Reconstruction was a matter of quickly restoring legitimate Southern state governments that were loyal to the Union. • Lincoln also believed that to reunify the nation, the federal government should not punish the South, but act “with malice towards none, with charity for all... to bind up the nation’s wounds...” • The assassination of Lincoln just a few days after Lee’s surrender at Appomattox enabled Radical Republicans to influence the process of Reconstruction in a manner much more punitive towards the former Confederate states. The states that seceded were not allowed back into the Union immediately, but were put under military occupation. • Radical Republicans also believed in aggressively guaranteeing voting and other civil rights to African Americans. They clashed repeatedly with Lincoln’s successor as president, Andrew Johnson, over the issue of civil rights for freed slaves, eventually impeaching him, but failing to remove him from office. • The three “Civil War Amendments” to the Constitution were added: <ul style="list-style-type: none"> – 13th Amendment: Slavery was abolished permanently in the United States. – 14th Amendment: States were prohibited from denying equal rights under the law to any American. – 15th Amendment: Voting rights were guaranteed regardless of “race, color, or previous condition of servitude” (former slaves). • The Reconstruction period ended following the extremely close presidential election of 1876. In return for support from Southern Democrats in the electoral college vote, the Republicans agreed to end the military occupation of the South. Known as the Compromise of 1877, this enabled former Confederates who controlled the Democratic Party to regain power. By the turn of the century, the Great Plains and Rocky Mountains regions of the American West were no longer a mostly unsettled frontier, but were fast becoming regions of farms, ranches, and towns. • The forcible removal of the American Indians from their lands continued throughout the remainder of the nineteenth century as settlers continued to move west following the Civil War. <p>Immigration</p> <ul style="list-style-type: none"> • Prior to 1871, most immigrants to America came from northern and western Europe (Germany, Great Britain, Ireland, Norway, and Sweden). The public schools served an essential role in the process of assimilating immigrants into American society.• Despite the valuable contributions immigrants made to building America during this period, immigrants often faced hardship and hostility. There was fear and resentment that immigrants would take jobs for lower pay than American workers would accept, and there was prejudice based on religious and cultural differences.• Mounting resentment led Congress to limit immigration through the Chinese Exclusion Act of 1882 and the Immigration Restriction Act of 1921. During the first two years of the war, the United States stayed officially neutral while Germany overran France and most of Europe and pounded Britain from the air (the Battle of Britain). In mid-1941, Hitler turned on his former partner and invaded the Soviet Union. Despite strong isolationist sentiment at home, the United States increasingly helped Britain. It gave Britain war supplies and old naval warships in return for military bases in Bermuda and the Caribbean. Soon after, the Lend-Lease Act gave the president authority to sell or lend equipment to countries to defend themselves against the Axis powers. Franklin Roosevelt compared it to "lending a garden hose to a next-door neighbor whose house is on fire." <p>The war in Asia</p> <ul style="list-style-type: none"> During the 1930s, a militaristic Japan invaded and brutalized Manchuria and China as it sought military and economic domination over Asia. The United States refused to recognize Japanese conquests in Asia and imposed an embargo on exports of oil and steel to Japan. Tensions rose, but both countries negotiated to avoid war. While negotiating with the United States and without any warning, Japan carried out an air attack on the American naval base at Pearl Harbor, Hawaii, on December 7, 1941. The attack destroyed much of the American Pacific fleet and killed several thousand Americans. Roosevelt called it "a date that will live in infamy" as he asked Congress to declare war on Japan. West Germany became democratic and resumed self-government after a few years of American, British, and French occupation. East Germany remained under the domination of the Soviet Union and did not adopt democratic institutions. • Following its defeat, Japan was occupied by American forces. It soon adopted a democratic form of government, resumed self-government, and became a strong ally of the United States. • Europe lay in ruins, and the United States launched the Marshall Plan, which provided massive financial aid to rebuild European economies and prevent the spread of communism. • The United Nations was formed near the end of World War II to create a body for the nations of the world to try to prevent future global wars. 	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. <p>The Cold War set the framework for global politics for 45 years after the end of World War II. It also influenced American domestic politics, the conduct of foreign affairs, and the role of the government in the economy after 1945.</p> <p>The Cold War was essentially a competition between two very different ways of organizing government, society, and the economy: the American-led western nations' belief in democracy, individual freedom, and a market economy, and the Soviet belief in a totalitarian state and socialism.</p> <p>The United States government's anti-communist strategy of containment in Asia led to America's involvement in the Korean and Vietnamese Wars. The Vietnam War demonstrated the power of American public opinion in reversing foreign policy. It tested the democratic system to its limits, left scars on American society that have not yet been erased, and made many Americans deeply skeptical of future military or even peacekeeping interventions.</p>	<p>How did the United States respond to the threat of communist expansion?</p> <p>What are the origins of the Cold War?</p> <p>What were the early significant events of the Cold War?</p> <p>What was the impact of the Cold War on Americans at home?</p> <p>What was the impact of the Vietnam War on Americans at home?</p>	<p>Origins of the Cold War</p> <ul style="list-style-type: none"> The Cold War lasted from the end of World War II until the collapse of the Soviet Union. The United States and the Soviet Union represented starkly different fundamental values. The United States represented democratic political institutions and a generally free market economic system. The Soviet Union was a totalitarian government with a communist (socialist) economic system. The Truman Doctrine of "containment of communism" was a guiding principle of American foreign policy throughout the Cold War, not to roll it back, but to keep it from spreading and to resist communist aggression into other countries. The North Atlantic Treaty Organization (NATO) was formed as a defensive alliance among the United States and western European countries to prevent a Soviet invasion of Western Europe. Soviet allies in Eastern Europe formed the Warsaw Pact, and for nearly 50 years, both sides maintained large military forces facing each other in Europe. The communist takeover in China shortly after World War II increased American fears of communist domination of most of the world. Rather than becoming strong allies, however, the communist nations of China and the Soviet Union eventually became rivals for territory and diplomatic influence, a split that American foreign policy under President Nixon in the 1970s exploited. After the Soviet Union matched the United States in nuclear weaponry in the 1950s, the threat of a nuclear war that would destroy both countries was ever-present throughout the Cold War. America, under President Eisenhower, adopted a policy of "massive retaliation" to deter any nuclear strike by the Soviets. <p>The Korean War</p> <ul style="list-style-type: none"> American involvement in the Korean War in the early 1950s reflected the American policy of containment of communism. 	<p>Formulate historical questions and defend findings, based on inquiry and interpretation. 		<ul style="list-style-type: none"> • After communist North Korea invaded South Korea, American military forces led a United Nations counterattack that drove deep into North Korea itself. Communist Chinese forces came into the war on the side of North Korea, and although the war threatened to widen, it eventually ended in a stalemate with South Korea free of communist occupation. <p>The Vietnam War</p> <ul style="list-style-type: none"> • American involvement in Vietnam also reflected the Cold War policy of containment of communism. • Beginning in the 1950s and continuing into the early 1960s, the communist government of North Vietnam attempted to install through force a communist government in South Vietnam. The United States helped South Vietnam resist. • The American military buildup in Vietnam began under President John Kennedy. After Kennedy’s assassination in 1963, the buildup was intensified under President Lyndon Johnson. • The scale of combat in Vietnam grew larger during the 1960s. American military forces repeatedly defeated the North Vietnamese forces in the field, but by fighting a limited war, could not force an end to the war on favorable terms. • America became bitterly divided over the issue. While there was support for the American military and conduct of the war among many Americans, others opposed the war, and active opposition to the war mounted, especially on college campuses. • After Johnson declined to seek re-election, President Nixon was elected on a pledge to bring the war to an honorable end. He instituted a policy of “Vietnamization,” withdrawing American troops and replacing them with South Vietnamese forces while maintaining military aid to the South Vietnamese. • Ultimately “Vietnamization” failed when South Vietnamese troops proved unable to resist invasion by the Soviet-supplied North Vietnamese Army. President Nixon was forced out of office by the Watergate scandal. In 1975, North and South Vietnam were merged under communist control.

This led to the coining of the term <i>McCarthyism</i>—the making of false accusations based on rumor or guilt by association. • The Cold War made foreign policy a major issue in every presidential election during the period. • The heavy military expenditures throughout the Cold War benefited Virginia’s economy proportionately more than any other state, especially in Hampton Roads, home to several large naval and air bases, and in Northern Virginia, home to the Pentagon and numerous private companies that contract with the military.
