EDUCATIONAL REGISTRY APPLICATION (ERA)

Educational Registry Application maintains information on DOE divisions, offices and staff. This application also maintains data for division and school administration, superintendent, superintendent's designee, principal, central office staff, school calendar, school programs, paired schools, division contacts, and triennial census counts.

The information collected within ERA is the Department of Education's official means of identifying schools for *No Child Left Behind Act of 2001* (NCLB) reporting, accreditation, assessment, mailings, contacts for Web-based data submissions, and the *Virginia Educational Directory.*

SSWS Admin is the tool used to grant users access to the various applications, reports and data collections available via SSWS.

The Educational Registry Application (ERA) and Single Sign-on for Web Systems (SSWS) Admin application are now fully integrated applications.

Integrating ERA and SSWS Admin provides for greater flexibility in granting school personnel division-level access for some applications and school-level access for others.
